

New Student Interface

What has changed?

- Material Design elements (similar to Google Classroom) to improve the experience on a variety of devices and increase familiarity with navigation patterns for students
 - Menu is now on left hand side for easier navigation on tablets
 - Tables and Tabs are based off of Material Design so students know how to navigate
- Functionality is still similar to old student home page
- Improved speed and functionality on the student interface
- Students can start assignments using a code by clicking “Start Assignment” button. Quick links still work, but codes are now an option as well.
