

Project 1: I was sitting around, minding my own business when....

Tell your story from the perspective of a: B Cell | Helper T Cell | Macrophage | Plasma Cell | Pathogen/Antigen

Project 2: Caption this!

For each step of the process, create a dialogue from the perspective of the cell.

Project 3: That's Acting!

Each member of your group plays the role of one of the cells to act out the process. Props can be used.

Project 4: ELI5: Explain it like I'm 5

Explain what is going on to a person who is much younger than you. Your instructor will play the 5 year old.
