

Privacy Policy – SOS Inventory Lot Available Qty

Last updated: July 31, 2026

Overview

SOS Inventory Lot Available Qty ("the Extension") is a browser extension that displays available inventory quantities in the lot selection dropdown on app.sosinventory.com.

Data Collection

The Extension does not collect, record, store, or transmit any personal data or user information of any kind.

How It Works

The Extension operates entirely within your browser. It reads the lot inventory data that the SOS Inventory application already fetches from its own API during your normal use of the site. That data is held temporarily in memory solely to display available quantities in the dropdown and is discarded when the page is closed or navigated away from.

Data Sharing

The Extension does not share any data with third parties. It makes no independent network requests and does not communicate with any external servers.

Cookies and Tracking

The Extension does not use cookies, analytics, tracking pixels, or any other tracking technology.

Changes to This Policy

If this policy is updated, the revised version will be posted at this URL with an updated date.

Contact Information

If you have any questions or feedback regarding this privacy policy, please contact the developer via the support link provided on the Chrome Web Store listing.
