HOKI311 SEO Case Study

Improving Brand Search Visibility in Indonesia

Prepared by Titans SEO Agency | Local & International SEO | 13+ Years of SEO Experience

Project Overview

HOKI311 approached Titans SEO Agency after the exact brand query “HOKI311” experienced visibility issues in Indonesia, while related searches such as “HOKI311 login” and “HOKI311 slot” had shown visibility. Previous domain changes also made consistent domain and brand signals an important priority.

Target market	Primary objective	Planned placements	Progress at update
Indonesia	Recover brand visibility	33	23+ links completed

Our Approach

Technical and On-Page Review

- Reviewed domain history, ranking concerns, existing backlinks, and target brand queries.
- Recommended keeping hoki311.com as the consistent primary domain and avoiding unnecessary domain or canonical changes.
- Identified opportunities to improve visible homepage content, titles, headings, internal links, and relevant landing pages.
- Treated possible access restrictions as a separate technical issue to investigate rather than assuming they caused the ranking problem.

Brand-Focused Link Building

We planned a 33-placement campaign to strengthen contextual brand relevance and authority for HOKI311 in Indonesia.

Placement type	Planned quantity
Indonesian-domain guest posts (.id)	3
Top X / Best Of listicles	10
Brand-mention guest posts	20
Total planned placements	33

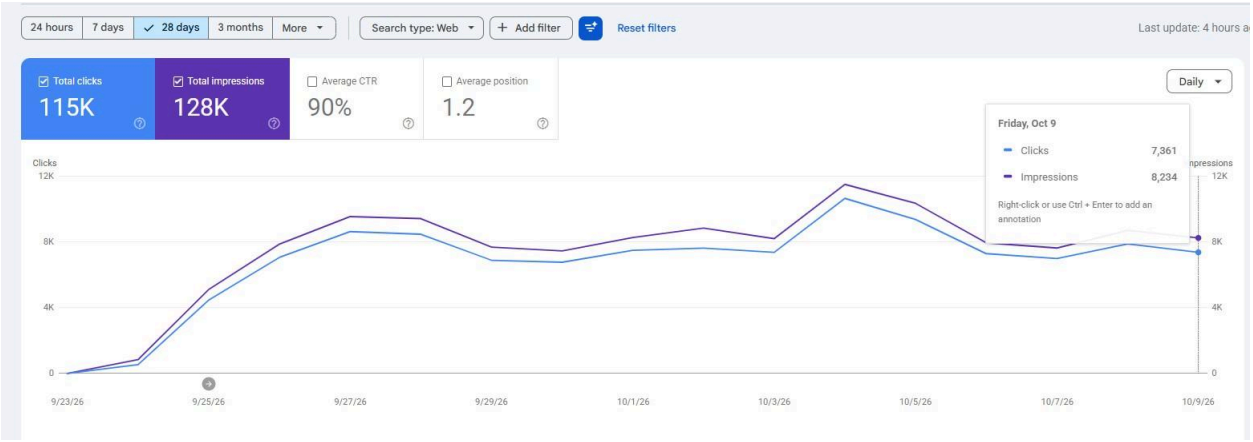

At the October 7, 2026 update, approximately 23+ links had been completed, with placement details to be tracked in the campaign sheet.

Performance Snapshot

The client-provided Google Search Console screenshots show substantial search activity during the selected 28-day reporting period (approximately September 12–October 9, 2026).

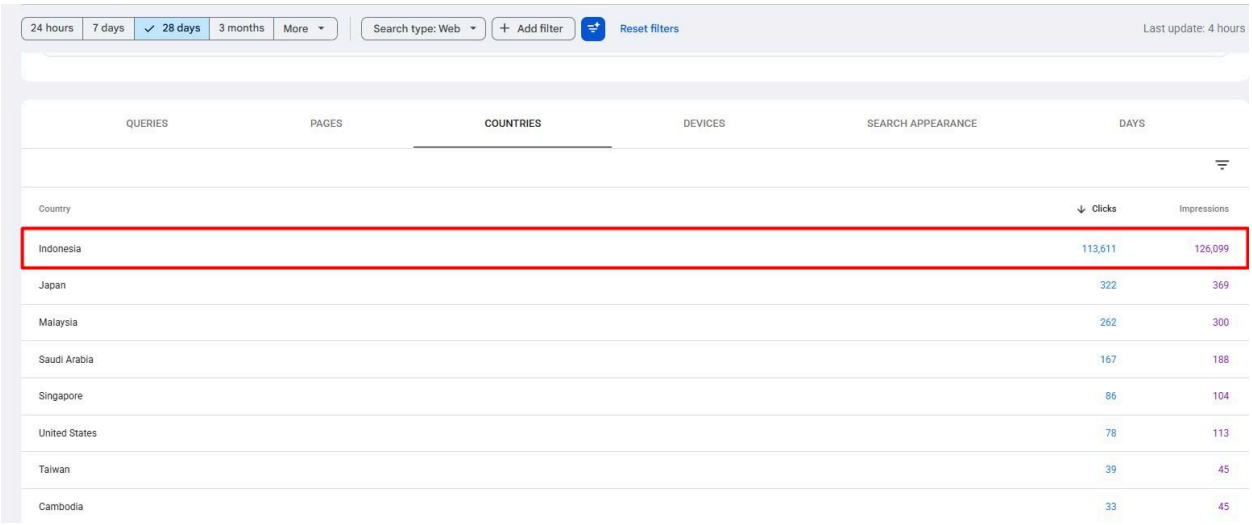

Metric	Total property	Indonesia	Reporting window
Clicks / Impressions	115K+ / 128K+	113,611 / 126,099	28 days

Google Search Console: Overall Performance

Indonesia: Country Performance

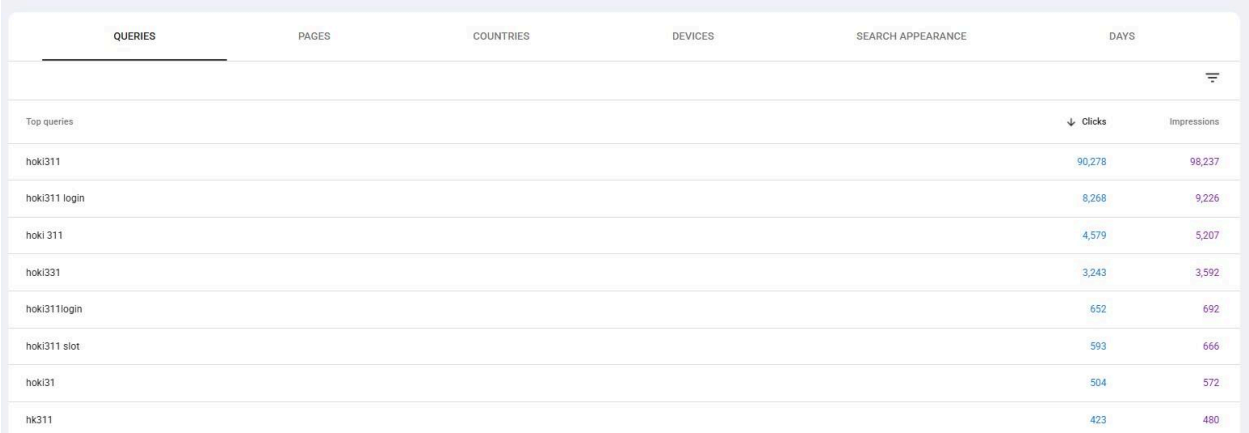

Country	Clicks	Impressions
Indonesia	113,611	126,099
Japan	322	369
Malaysia	262	300
Saudi Arabia	167	188
Singapore	86	104
United States	78	113
Taiwan	39	45
Cambodia	33	45

Indonesia accounted for 113,611 clicks and 126,099 impressions in the supplied country report.

Top Brand Queries

The query report shows that the exact brand query was the leading traffic driver, alongside login, spelling, and related brand variations.

Source: client-provided Google Search Console query report.

Query	Clicks	Impressions
hoki311	90,278	98,237
hoki311 login	8,268	9,226
hoki 311	4,579	5,207
hoki331	3,243	3,592
hoki311 slot	593	666

What Made the Campaign Different

- A brand-first approach rather than relying on generic backlink volume alone.
- A planned mix of local-domain guest posts, listicles, and contextual brand mentions.
- Domain consistency and on-page recommendations alongside link building.
- Performance monitoring using country, query, and overall search data.

Next Steps

- Complete and document the remaining planned placements.
- Keep the primary domain and canonical signals consistent.
- Improve important landing pages and internal links.
- Separate branded and non-branded queries in ongoing GSC reporting.
- Compare subsequent reporting periods to assess sustained changes in visibility.

Final Outcome

HOKI311's campaign was built around a clear objective: strengthen brand search visibility in Indonesia while creating a more consistent SEO foundation. The supplied GSC report shows 115K+ clicks and 128K+ impressions overall, including 113,611 clicks and 126,099 impressions from Indonesia during the selected 28-day period. The next phase focuses on sustaining brand visibility and identifying opportunities for broader non-brand growth.

Thai SEO Case Study — Competitive UFA / UFABET Keywords

From Strategic Content & Authority Building to Page #2 in Google Thailand in 3 Months

Client Overview

Industry: Online Betting / iGaming

Target Market: Thailand

Campaign Duration: 3 Months

Target Keywords: Competitive UFA, UFABET, UFA Login, เว็บแทงบอล and related Thai search terms

Primary Goal: Increase organic visibility, rankings, impressions, and qualified search traffic in Google Thailand.

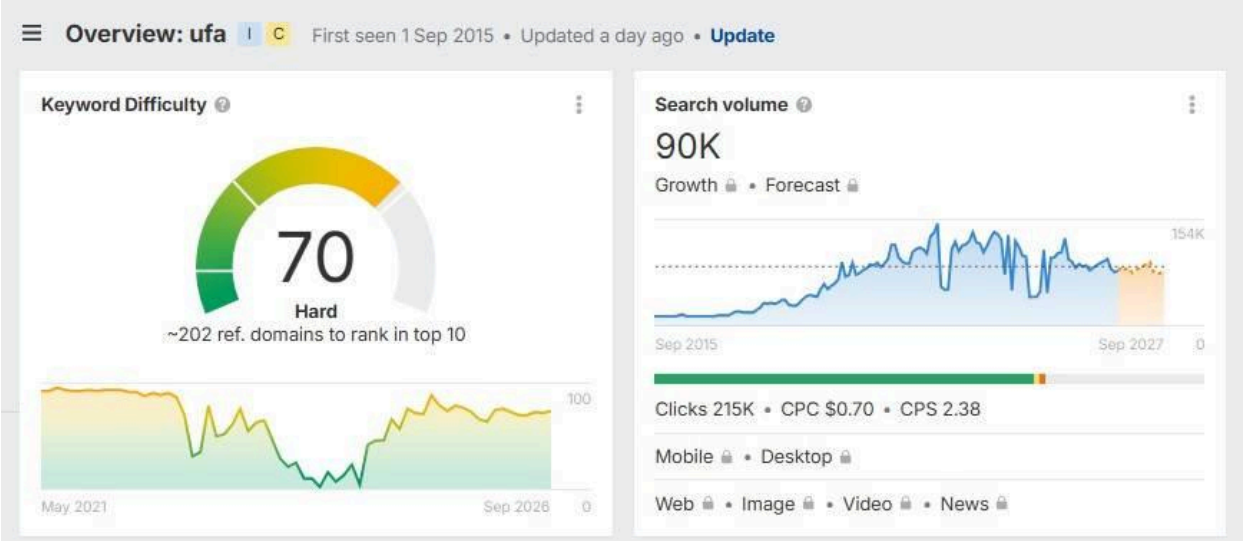

The client was operating in a highly competitive Thai iGaming search environment, where established websites were already ranking with strong backlink profiles and substantial topical authority.

The objective was not simply to build backlinks, but to develop the website's content depth, topical authority, trust signals, and referring-domain profile around the primary UFA/UFABET keyword cluster.

The Challenge

The target keyword set was highly competitive.

One of the primary keyword sets had an estimated Keyword Difficulty of 79/100 ("Super hard"), with approximately 90K monthly search volume shown in the keyword research data.

Keyword difficulty and search volume snapshot

The website needed to compete against domains that already had:

- Strong referring-domain profiles
- Established topical authority
- Large amounts of supporting content
- Existing rankings across UFA/UFABET-related queries
- Strong homepage and brand signals

Rather than relying on a single type of link, we built the campaign around content + authority + competitor backlink analysis + topical coverage.

Campaign Strategy

Our approach was divided into three progressive stages.

Month 1 — Foundation & Authority

The first month focused on strengthening the website's foundation and establishing the initial authority signals.

Work completed:

- Updated and improved the homepage content
- Published supporting blog articles

- Built targeted guest post placements
- Added brand-mentioned placements
- Acquired relevant homepage links
- Began strengthening the site's topical relevance around UFA/UFABET terms

The objective was to make sure the website had a stronger content and authority foundation before scaling the campaign.

Month 2 — Expanding Topical Authority

During the second month, we expanded the content footprint while continuing to build authority.

Content

We published additional supporting blog content targeting relevant UFA/UFABET-related search queries and variations.

Authority Building

The campaign continued with:

- Guest posts
- Brand mention placements
- Relevant homepage links
- Authority-focused referring domains
- Supporting links pointing toward important pages

At this stage, we also continued analyzing competing websites to understand which referring domains were contributing to their rankings.

Competitor Referring-Domain Analysis

One of the important parts of the campaign was analyzing the backlink profiles of websites already ranking for the target Thai keywords.

Instead of treating backlink acquisition as a volume exercise, we looked for relevant referring domains already being used by competing sites.

We identified suitable opportunities and built placements from selected competitor-related referring domains.

This helped the campaign in two ways:

1. Strengthened authority around the primary target pages

2. Created additional relevance signals that supported other UFA/UFABET-related keywords across the website

This broader approach helped rankings improve beyond just the primary keyword.

Month 3 — Topical Cluster Expansion

The third month was where we significantly increased the site's topical coverage.

We created:

10 Pillar Blogs

These pillar pages were designed around important UFA/UFABET-related topics and served as the foundation for broader topical clusters.

We then created:

50 Supporting Blog Articles

The supporting articles were developed around relevant keyword variations and connected back into the pillar content structure.

This created a much deeper topical footprint rather than having only a few pages targeting the main keywords.

Authority Building Continued

Alongside the pillar and supporting content, we continued with:

- Listicle placements
- Brand mention placements
- Homepage links
- Relevant guest posts
- Placements from competitor-related referring domains

The objective was to build authority around both the main commercial pages and the wider topical ecosystem.

Results

By the third month, the campaign began showing a significant increase in organic visibility and rankings.

Main Result

The website reached Position #2 in Google Thailand for a major target keyword within the UFA/UFABET keyword group.

The ranking improvements were accompanied by a noticeable increase in:

- Organic clicks
- Search impressions
- Keyword visibility
- Rankings across related UFA terms
- Supporting keyword performance

The campaign also generated improvements across several related keywords rather than relying solely on the primary term.

Google Search Console Growth

The Google Search Console data shows the significant increase in organic performance during the campaign period.

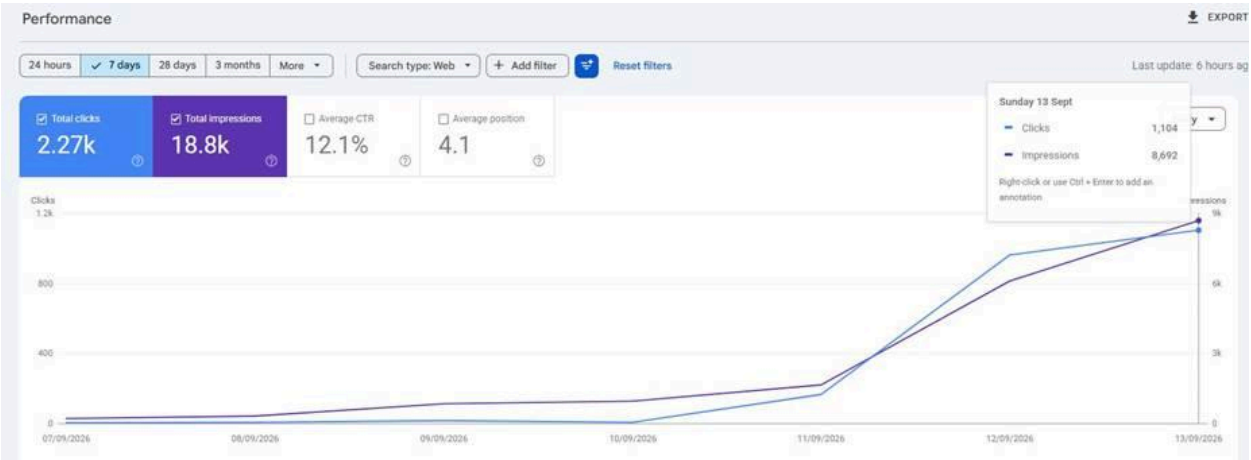

The 7-day GSC snapshot shows:

Metric	Result
Total Clicks	2.27K
Total Impressions	18.8K
Average CTR	12.1%
Average Position	4.1

On September 13, the website recorded approximately:

1,104 clicks and 8,692 impressions in a single day.

This represents a substantial increase compared with the much lower activity visible at the beginning of the campaign.

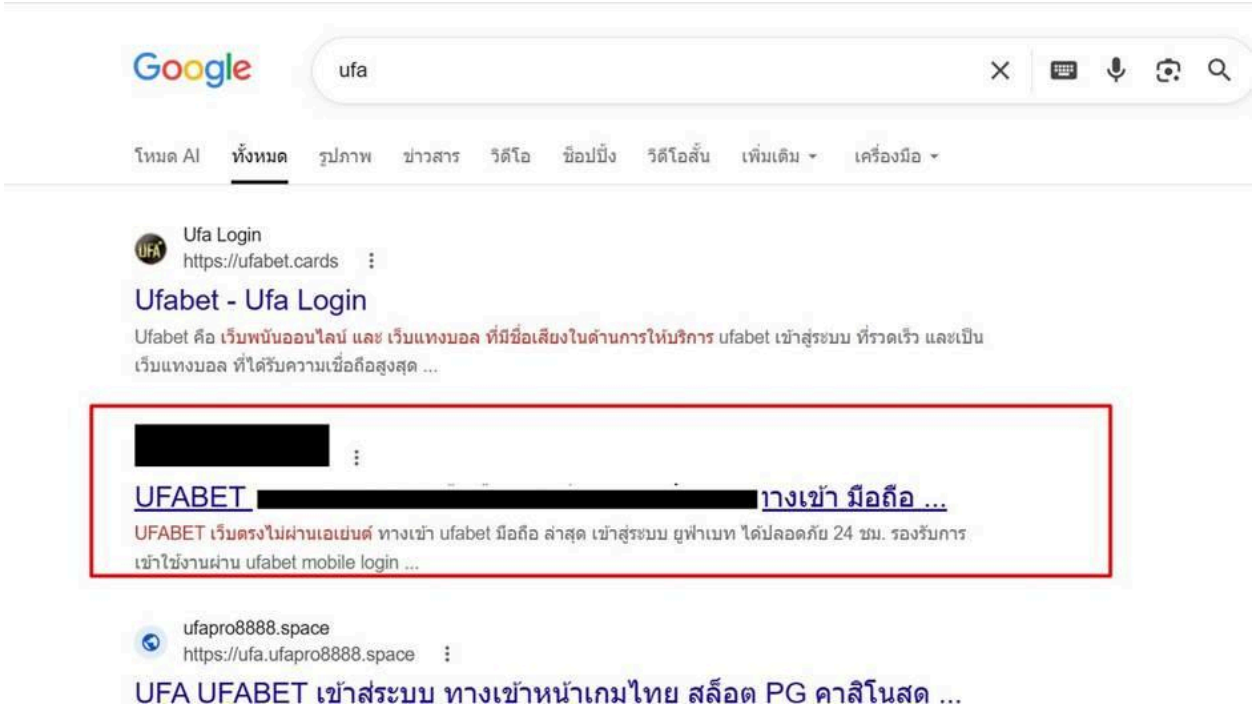

Google Search Console performance during the campaign

Google Ranking Visibility

The ranking screenshots demonstrate the website appearing prominently for competitive Thai searches including:

ufa

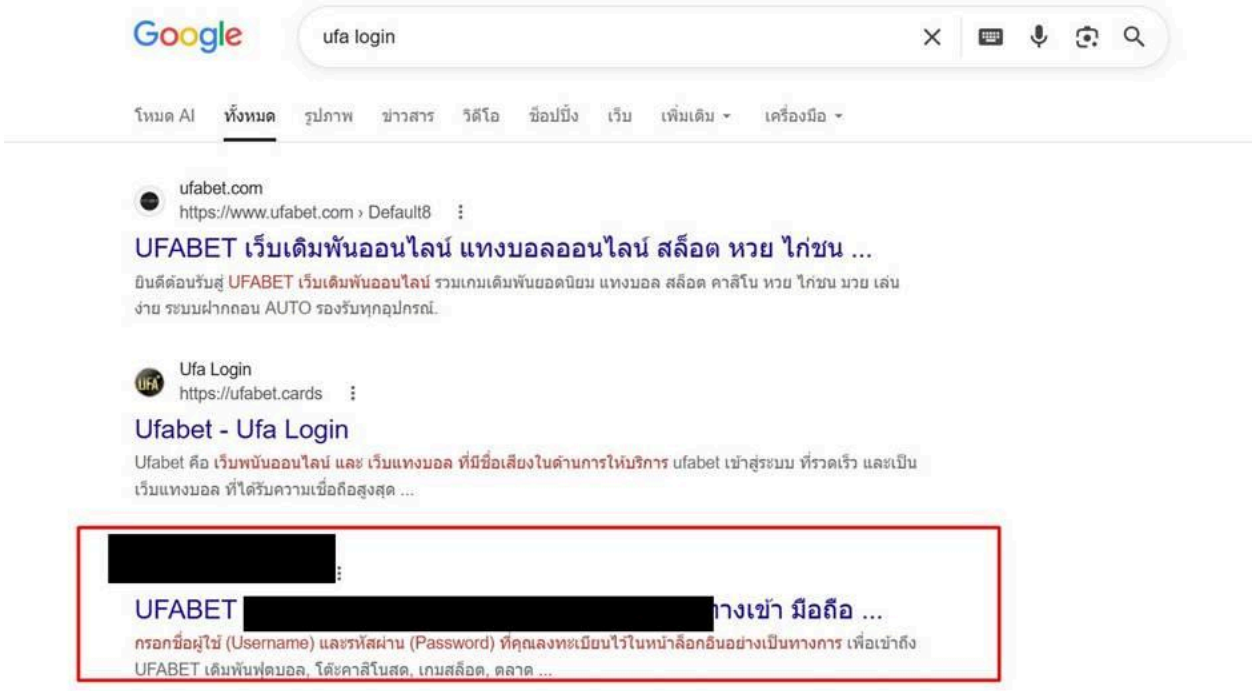

The target website was visible near the top of the Google Thailand results.

ufa login

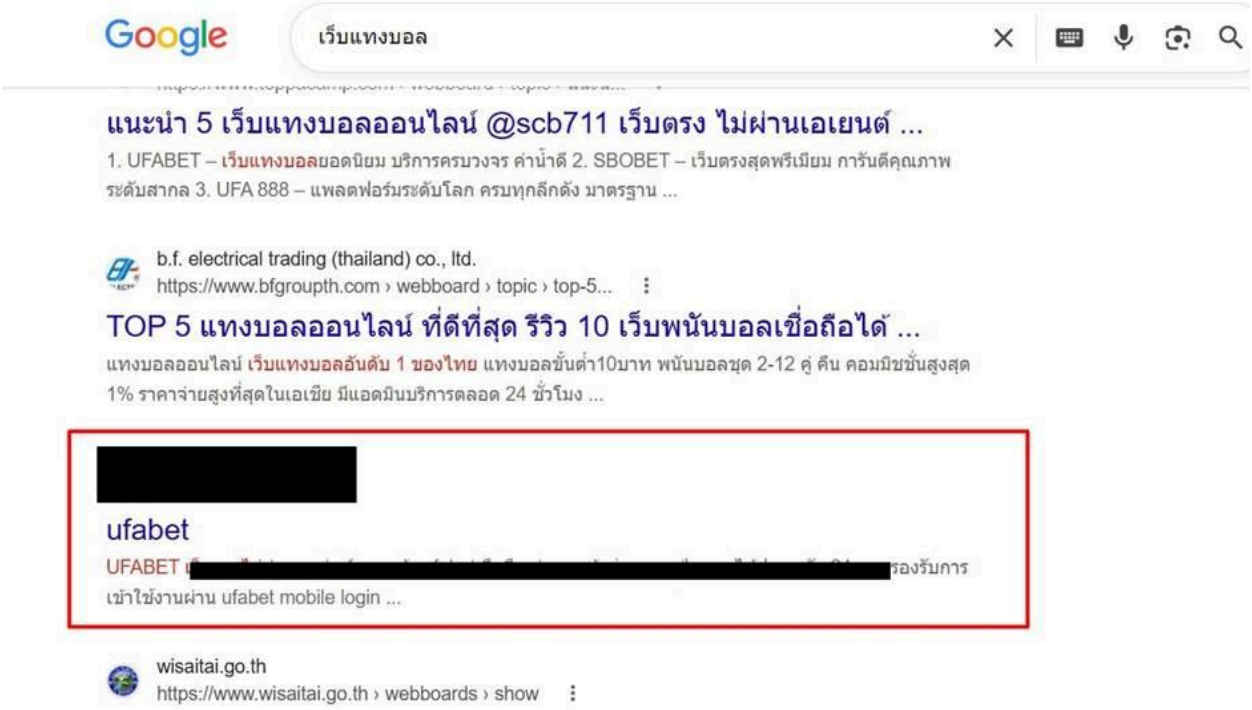

The website was also appearing prominently for the commercial login-related query.

Google Thailand result for the target 'ufa login' search

เว็บแทงบอล

The site was visible among the competitive Thai betting-related results.

Google Thailand result for the competitive Thai betting-related query

What Made the Campaign Work?

The campaign wasn't based on one single SEO tactic.

Instead, we combined several layers:

01. On-Page Optimization

Improved the homepage and developed content specifically around the target keyword ecosystem.

02. Topical Coverage

Built 10 pillar pages + 50 supporting articles to create a broader topical footprint.

03. Strategic Link Building

Used a combination of:

- Guest posts
- Brand mentions
- Listicle placements
- Homepage links

- Competitor-related referring domains

04. Competitor Analysis

Analyzed ranking competitors and identified relevant referring-domain opportunities that could be replicated strategically.

05. Brand & Authority Signals

Continued building brand mentions and authority links rather than relying exclusively on exact-match keyword anchors.

3-Month Campaign Timeline

Month	Main Activities	Objective
Month 1	Homepage optimization, blog content, guest posts, brand mentions, homepage links	Build foundation & initial authority
Month 2	Additional blog content, guest posts, brand mentions, homepage links	Expand topical relevance & trust
Month 3	10 pillar blogs, 50 supporting articles, listicles, brand mentions, homepage & competitor-source links	Scale topical authority & ranking strength

Final Outcome

Within three months, the campaign progressed from building the site's foundation to achieving top-level visibility in Google Thailand for highly competitive UFA/UFABET-related searches.

The website reached Position #2 for a major target term, while Google Search Console showed strong growth in both clicks and impressions.

More importantly, the strategy produced improvements across a wider group of related keywords, demonstrating the benefit of combining topical content expansion with strategic authority building and competitor referring-domain analysis.

Local SEO Case Study: Anchorage Dental Practice

Client Overview

Industry: Dental / Healthcare

Target Location: Anchorage, Alaska, USA

Campaign Focus: Local SEO, Authority Building, Brand Mentions & High-Authority Backlinks

Project Brief

The client's primary goal was to improve rankings for highly competitive local dental keywords in Anchorage, Alaska.

Order form

Target location & country	Anchorage, Alaska USA
Website URL & Keywords	[redacted] Keywords (in order of importance) anchorage dentistry dentists anchorage dental anchorage dental in anchorage dentist anchorage dentist in anchorage ak anchorage dental

Target keywords included:

- Dentist Anchorage
- Dentists Anchorage
- Dental Anchorage
- Dentist in Anchorage
- Dentist in Anchorage AK
- Anchorage Dental
- Veneers Anchorage
- Cosmetic Dentist Anchorage
- TMJ Treatment Anchorage

The Challenge

When the client first contacted us, rankings remained stagnant despite having relevant content and service pages.

The website lacked the authority required to compete with established dental practices already occupying the top search positions.

The client reached out looking for guidance after noticing that rankings were not improving for important target keywords.

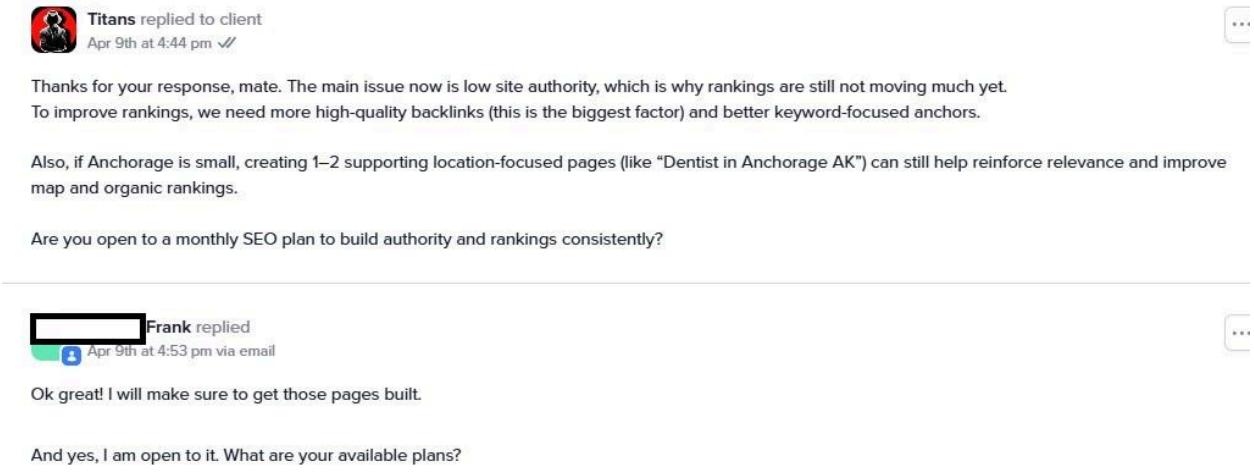

After a detailed analysis, we identified the primary issues:

- Low website authority
- Insufficient backlink profile
- Weak local relevance signals
- Limited topical authority compared to competitors

Our recommendation was straightforward:

- Build high-quality authority backlinks
- Increase brand mentions
- Improve topical relevance
- Create supporting location-focused pages
- Strengthen anchor text profile

The client agreed to move forward with the strategy.

Strategy Implemented

To improve rankings and establish stronger authority, we launched a comprehensive SEO campaign focused on three key pillars.

1. Authority Link Building

We acquired contextual backlinks from authoritative websites to strengthen the website's trust signals and improve its ability to rank for competitive local keywords.

2. Brand Mention Campaigns

We published branded mention articles on authority websites to increase brand visibility and entity recognition.

Below are examples of live placements delivered during the campaign.

3. Supporting Location Pages

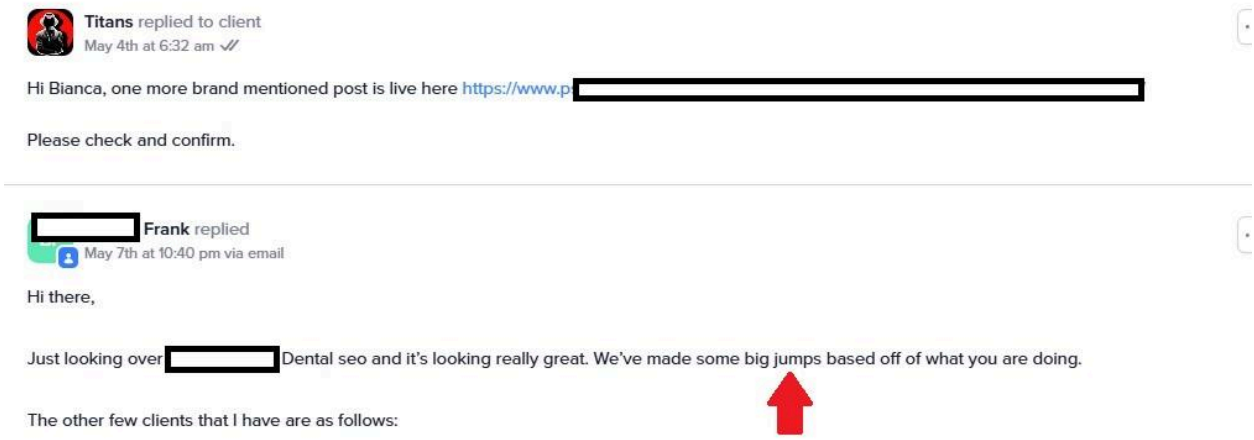

We advised the client to build additional location-focused and service-focused pages to reinforce topical relevance and improve local search visibility.

This combination of authority building and content expansion created a strong foundation for long-term ranking growth.

Client Feedback

As rankings started improving, the client noticed significant movement across multiple target keywords.

The client specifically acknowledged the progress and the positive impact of the campaign.

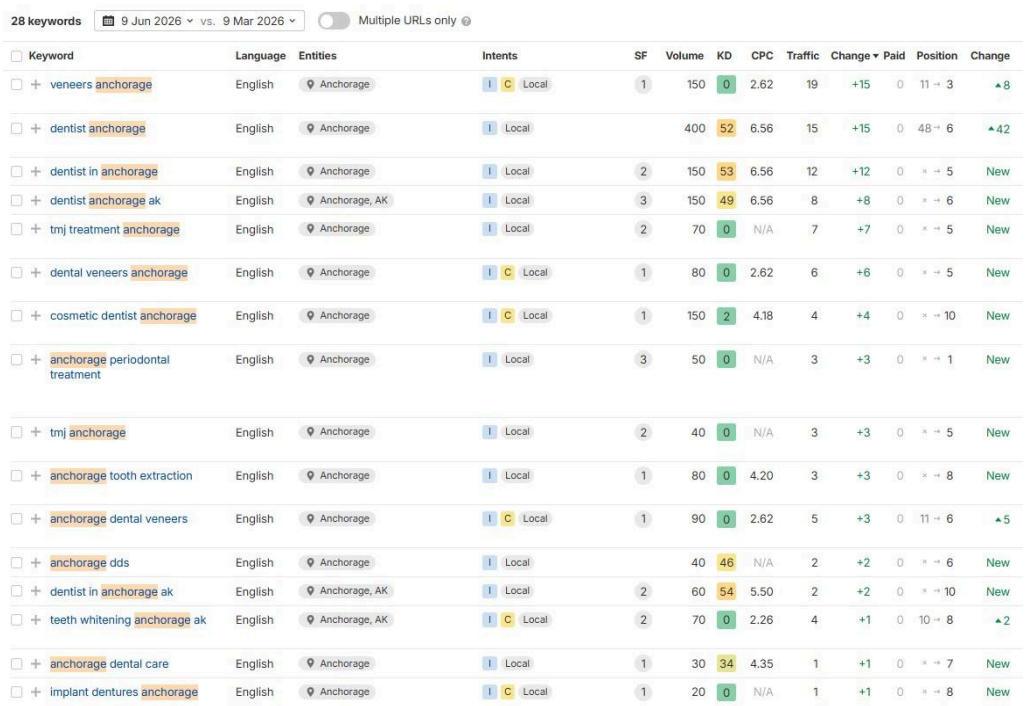

"We've made some big jumps based off what you are doing."

Positive feedback from clients is always one of the strongest indicators that a campaign is moving in the right direction.

Ranking Improvements

Over the following months, rankings improved significantly across the primary target keywords.

Organic Traffic Growth (Updated Traffic Data)

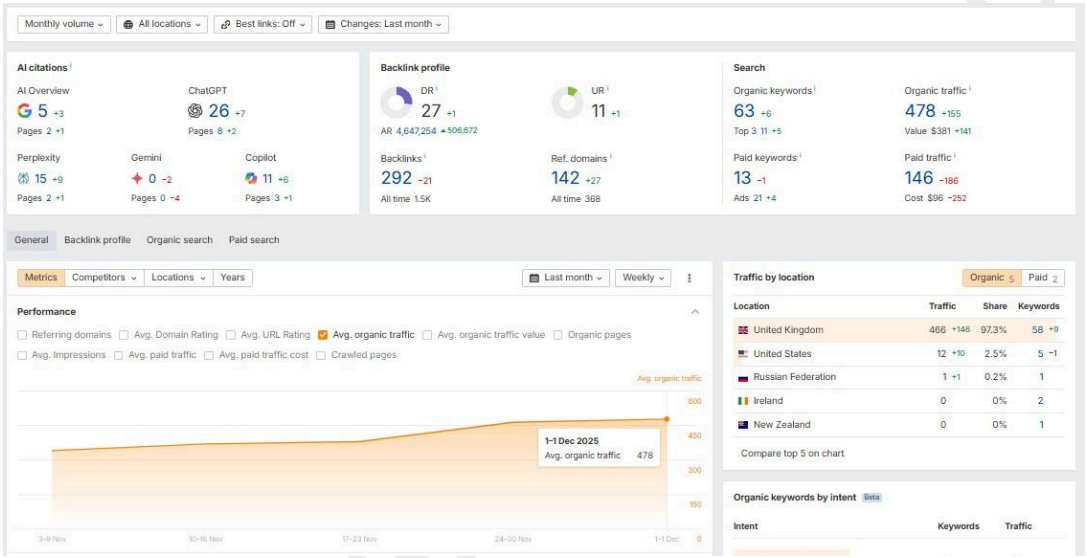

Ranking wins converted into traffic quickly:

- Went from **moderate traffic to 466 organic visitors (+146 in 30 days)**
- Clean, steady upward trend — no fake traffic spikes
- Keyword value increased by +$141, hitting $381+ monthly traffic value

- Almost all traffic is **geo-targeted UK searches, not random global hits**

These are real local users searching for ear wax removal, microsuction, and syringing services in Glasgow.

Organic traffic curve showing consistent growth — **466+ UK visitors & climbing.**

Authority & Backlink Profile (Updated Backlink Data)

We built the **authority foundation** that makes these rankings stick long-term:

- **+27 new referring domains**
- DR increased to 27 (+1)
- Over 143 total referring domains
- Contextual & niche-relevant placements
- 100% clean, safe, long-term strategy (zero spam)

This authority layer is why page-1 rankings stabilized and continue to climb.

Authority boost: **27 new RDs, DR +1, strong contextual link profile → rankings locked in.**

And the best part?

This growth is NOT "random traffic."

It is the **direct result of authority-building** posts such as:

- Ear xxxxxxxxxx Glasgow – What Patients Should Know
- Why xxxxx xxxxxx xxxx Ear Syringing (Local Glasgow Impact)
- Boots vx xxxxxx xxxxxx xxxxxx for Ear Wax Removal?

These placements **improve both authority + topical relevance**, leading to rankings like:

- ear xxx xxxxxx glasgow – #4

US Home Services Client (45 Days)

Titans SEO Agency

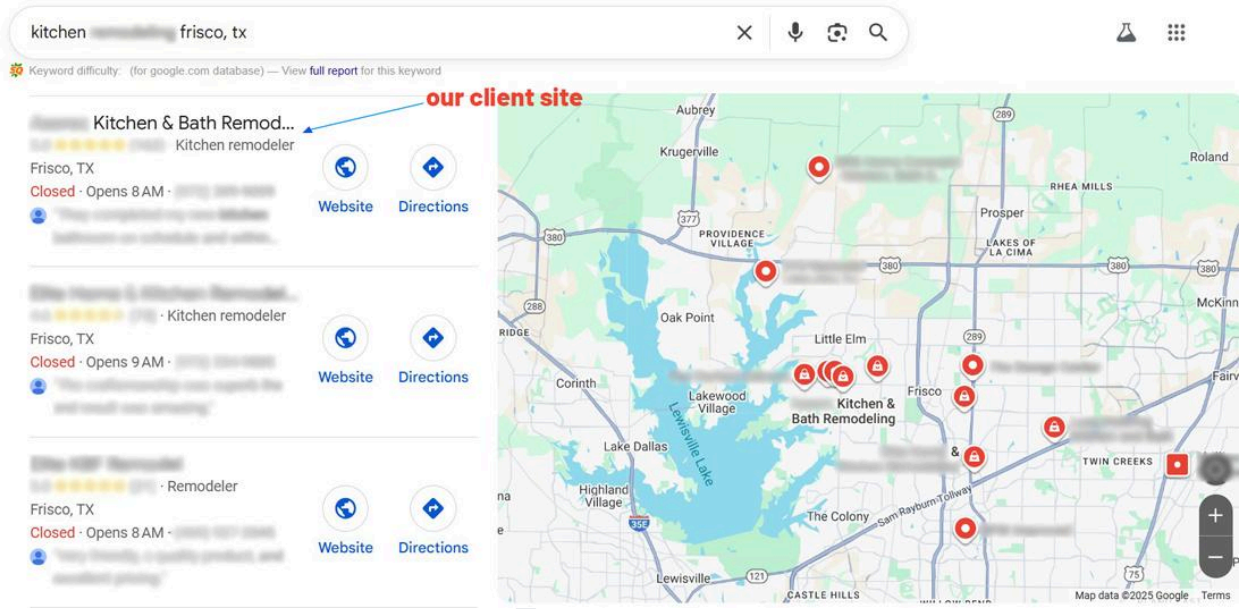

Ranking Boosts (Keywords & Positions)

Our client runs a **home services business in the US** and wanted one thing:
"Boost my rankings for my local service pages."

Here's what we pulled off in just **45 days**

- **117+ keywords ranking** (70 brand new this month)
- Local service keywords **moved from nowhere to Top 10** (several already Top 5)
- Massive jumps: +15, +30, +52, even +67 positions in weeks
- **the biggest win in Map Pack rankings:**
    - Google Business Profile moved from **Position #15 → Position #1**

- Huge visibility boost for high-intent keywords like:
  - *kitchen rexxxxxxxxx + city*
  - *bathroom rexxxxxxx + city*
  - *home renxxxxxxx + city*
- Result: More calls, more visibility, and more leads from the local 3-pack.

From nowhere to Page 1 in 45 days — AND from **Map Pack invisibility to the #1 spot** for core services.

This is how we approach **US local SEO**. Not with just random links, but **anchor intent optimized backlinks + geo focused targeting** that actually works.

From nowhere to **Page 1 in 45 days** (US local keywords climbing fast)

Organic Traffic Growth (Updated Traffic Graph)

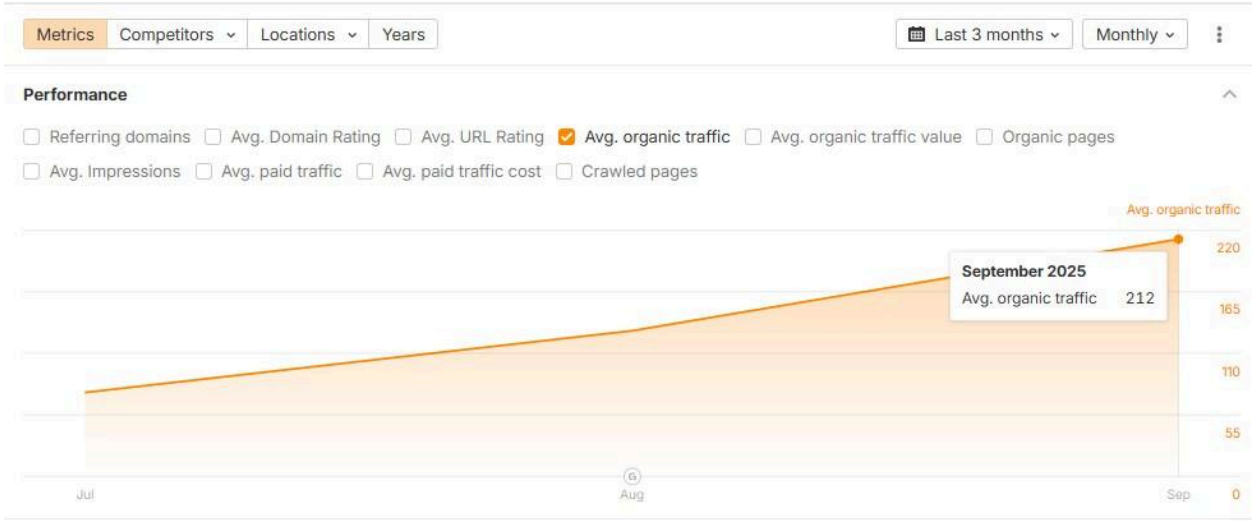

Ranking gains quickly translated into traffic:

- From near **zero to 200+ average organic visitors in under a 45 days**
- Natural, steady upward trend (no fake spikes, no drops)
- Organic traffic value increased by +$759, reaching $1.5k+ total

And remember, this is **geo targeted US traffic**, not random global clicks. These are **real local users searching for home services.**

Organic traffic curve going with steady growth, **212+ US visitors already**.

Titans SEO Agency

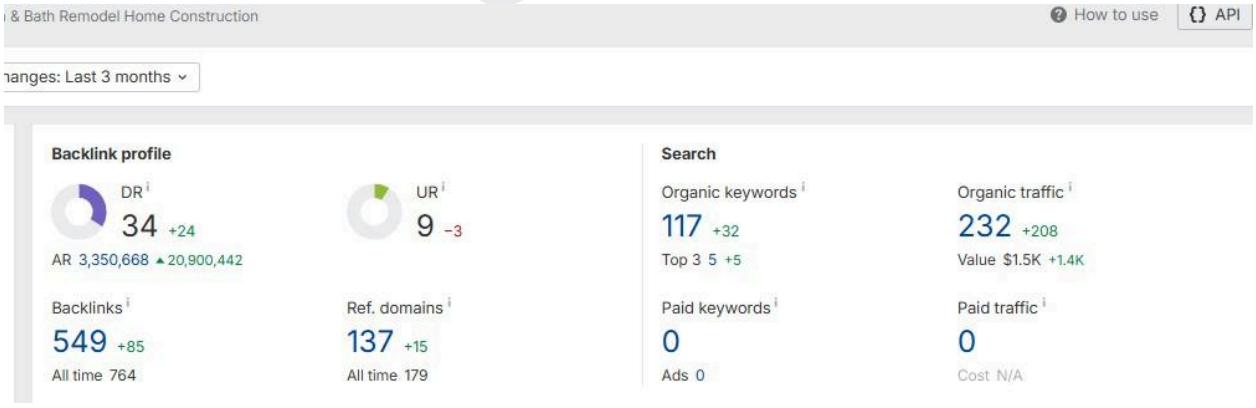

Authority & Backlink Profile (Updated Backlink Data)

We built the authority foundation that makes rankings stick:

- **+33 new backlinks from +16 referring domains** (137 total)
- Domain Rating jumped **+19 (now DR 34)**
- **Contextual placements** on trusted sites
- **100% clean, safe & long-term growth** (no churn-and-burn spam)

This authority layer is what locks rankings in and sets up compounding growth for the coming months.

Authority boost: **DR +24, 30 fresh links, 15 new RD** → rankings locked in.

And here's the kicker, this growth isn't random. It's the **direct result of premium guest post placements we secured**, such as:

- Modernize Your Kitchen – XXXXXXXXXXX, TX

- Step-by-Step Guide to Planning a XXXXXXXXXXXXXXXXXXYX, TX

These posts don't just deliver authority, they lock in **topical relevance around high-intent, local remodeling keywords**. The payoff? **Rankings like**:

- kitchen remodel XXXXXXXXX - #2
- bathroom XXXXXXXXXX - #5
- home XXXXXXXXXXXXXXXX - #9

SEO Case Study (New website)

Casino Client (30 Days) targeting Thailand

Rapid SEO Growth — 200K+ Organic Visitors in 30 Days

Time period: September 2025 to October 2025

Prepared by: Titans SEO Agency

Keywords: Betflix & Betflik

Client Overview

A Thailand-based online brand partnered with our SEO team to strengthen its digital visibility, organic reach, and keyword authority. The primary goal was to drive **targeted organic traffic** and increase **keyword rankings** for high-value branded and informational terms.

Objectives

- Boost organic traffic and visibility in the Thai market
- Improve rankings for both branded and informational keywords
- Increase the website's backlink authority and domain rating
- Strengthen the overall SEO footprint with measurable ROI

Strategy Overview

Our approach followed a **3-Layer SEO Blueprint** designed to deliver sustainable growth and rapid visibility:

1. **On-Page Optimization**
    - Technical SEO audit and content restructuring
    - Targeted keyword mapping and internal linking strategy
    - Optimization for CTR and dwell time

2. **Authority Backlink Layer**
    - Strategic acquisition of **6,200+ high-quality backlinks**
    - Diversified anchor text strategy with natural link velocity
    - Over **1,500 referring domains** from relevant and authoritative sources
3. **Content & Engagement Layer**
    - Development of SEO-focused branded and informational content
    - Click and engagement signal boosting for ranking acceleration
    - Localization for **Thai audience (99.9% traffic share)**

Results Overview (in 30 Days)

Traffic Insights

- **Thailand dominates** with **99.9%** of total organic share
- Secondary countries: South Korea, USA, Taiwan, and India (<1% each)
- Traffic growth stabilized after the initial surge, indicating strong ranking retention

Performance Graph

The traffic trend shows a **sharp spike** in organic sessions during the second week, stabilizing at the 200K+ mark, reflecting both **algorithmic recognition** and **organic consistency**.

Conclusion

This campaign showcases how our **data-driven SEO blueprint** can transform online visibility in a short period.

By leveraging high-authority link networks, localized keyword targeting, and optimized engagement signals, we achieved:

- 200K+ monthly organic visitors
- $80K+ traffic value
- 178 new keywords in top rankings

These strategies are **fully replicable** for SaaS, ecommerce, agency, and local business models.

SEO Case Study: Mayalounge.net

Client Overview:

Website: mayalounge.net
Industry: Online Gaming & Betting
Campaign Start Date: November 30, 2021
Target Market: Thailand

Main Goal: Improve organic rankings for high-competition branded and transactional keywords related to fun88

Initial Challenge:

When the client approached us, they were struggling to rank their critical keywords, including brand-specific and transactional Thai terms such as:

- fun88
- fun88mobile
- **สมัคร** fun88
- **ฟัน**88

At that time, these keywords were buried deep on the 2nd and 3rd pages of Google Thailand, far from their monetization goals.

Strategic Action Plan:

We immediately recommended a **value added backlink strategy** along with the below details.

Targeted URLs and Keywords:

URL	Keyword
https://mayalounge.net/	fun88
https://mayalounge.net/mobile/	fun88mobile
https://mayalounge.net/**สมัคร**-fun88/	**สมัคร** fun88
https://mayalounge.net/	**ฟัน**88
https://mayalounge.net/	fun88**แท้**

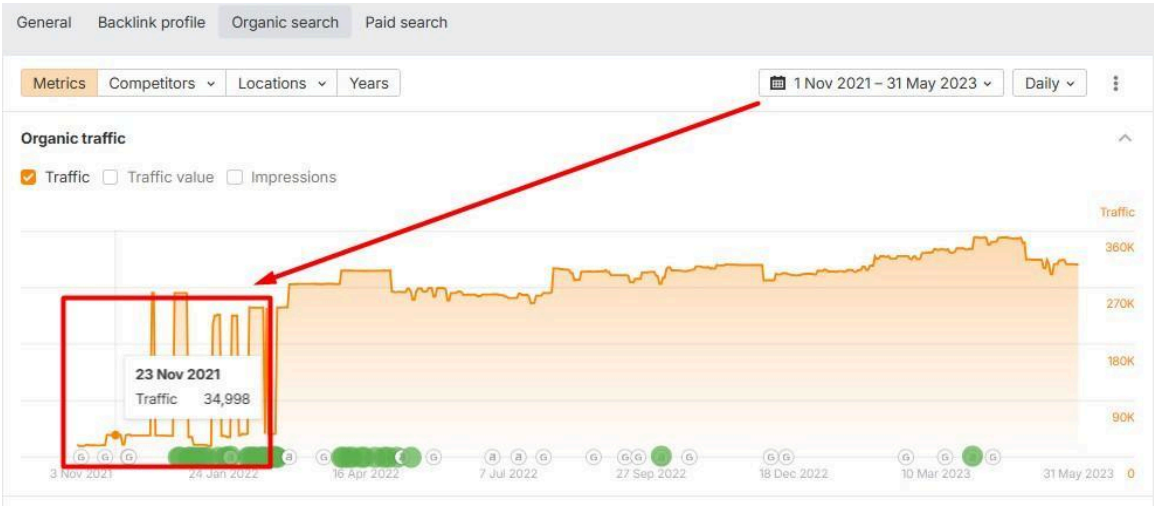

URL	Keyword
https://mayalounge.net/	fun88 **เข้าระบบ**
https://mayalounge.net/	**เดิมพัน** fun88
https://mayalounge.net/	fun 888
https://mayalounge.net/	**เว็บพนันออนไลน์ เว็บตรง** fun88
https://mayalounge.net/	www.fun78.com

Phase 1 Results (Dec 2021 – Jan 2022):

After publishing and indexing the links, the results were fast and powerful:

- All major keywords jumped to Page 1
- Website traffic skyrocketed from 18,794 to 261,547 monthly visitors
- Client gained significant visibility in Google's AI Overviews

But over time, with rising competition and algorithm changes, some keywords slipped back to the 2nd page.

Phase 2 Scaling (Jan 2022 – March 2022):

To combat ranking volatility and build long-term authority, we proposed a more **unique & aggressive backlink strategy** to bring the rankings back.

Despite the substantial investment, the client trusted our expertise based on the prior success, and the results didn't disappoint:

- All keywords reached Top 3 positions
- Traffic surged even further
- SERP visibility stabilized for over 12 months

Ongoing Maintenance Strategy:

To retain rankings and ensure long-term SEO stability, we proposed a **monthly SEO plan** for authority upkeep.

The client agreed and continued link building with us regularly up to May 2023, successfully sustaining their dominance in SERPs.

Campaign End & Lessons Learned:

In May 2023, the client paused link building, which over time led to a slight decline in rankings.

Key Takeaway: SEO is not a one-time investment. Ongoing authority building is crucial to maintain top positions, especially in competitive markets like online betting.

Final Results Snapshot:

Metric	Before	After
Monthly Traffic	18,794	261,547
Keyword Positions	Page 2–3	Page 1 (Top 3)
Link Profile	Low Authority	150+ DA40+ Guest Posts
Trust Score	Moderate	High

If you're running any **other local business or lead gen site** (casino, igaming, plumbing, roofing, cleaning, etc.) and stuck on page 2–3, this is the proven system to push you onto **page 1 fast**.

Yesterday at 4:25 PM #2,459

Just wanted to drop a quick review after testing their outreach.

Got a few placements done and honestly the quality surprised me. The sites were actually niche relevant, and most of them had real traffic.

The content was decent too, not spun garbage. Links were placed naturally within the article, which is what I was mainly looking for.

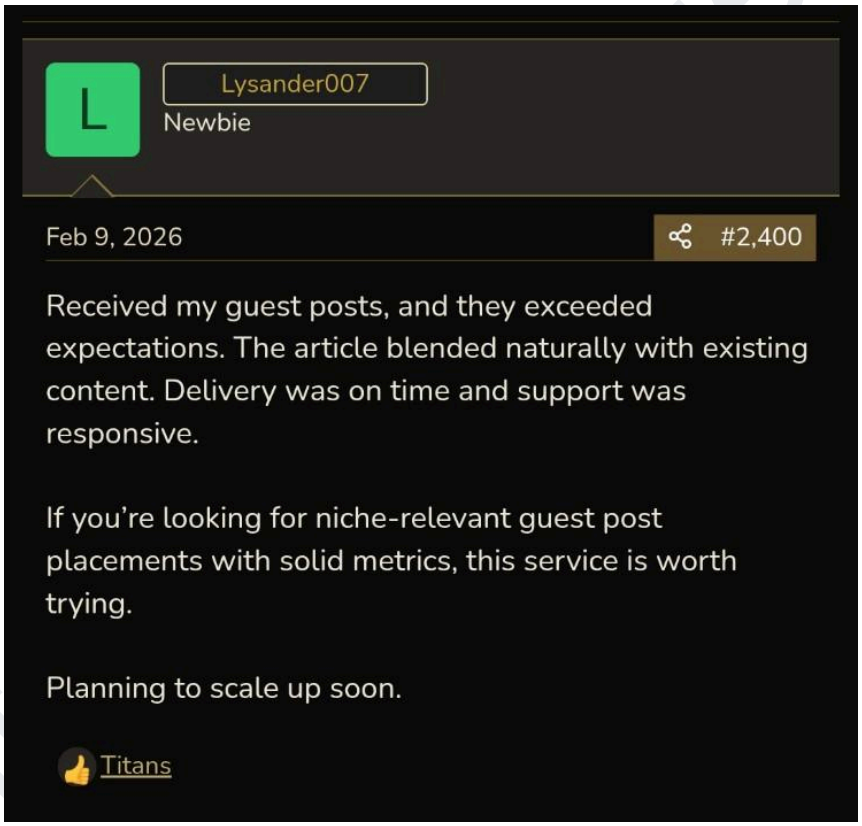

Didn't expect instant rankings, but I did notice some movement on a couple of pages within 2–3 weeks. That's usually a good sign these links are actually indexed and passing value.

Overall, solid service if you're looking for clean outreach links. Will scale this up for a few more pages.

I recommend this service to everyone.

I just received my first guest post order to test the service, and I'm impressed. The article was published today on a niche-relevant website with strong metrics, and it's already indexed. The content quality is excellent: well-written and clearly not AI-generated.
Overall, this is a solid, high-quality service. I'm genuinely satisfied and will be ordering more.

Another great job done by Titans. The traffic for my local site has jumped from 800 to 1400, and I'm very happy with the results so far.

He recommended a new custom package to improve the local search results every time and now I'm placing an order for new projects. Excited to see the results.

Recommended service. Keep it up.

Summary

For the review, @Titans provided me with a guest post on a site based on their "premium" package. The details of my review are below.

Service Highlights

- Something I really liked about this service is that after the article was finished, @Titans sent me a download link to the article and asked me to review and approve (the article, not the sales thread) before it was published. This provided me with the chance to look over the article for selling and grammar errors, a few of which I found and pointed out to the seller. They fixed the issues and then proceeded to publish the article.
- I checked the article for plagiarism and the checker I used said it had 0% plagiarism.
- The article was pretty decently written and contained videos and related links in it (not to competing sites).
- The DA of the site was 75, the PA was 62, and the site was 16.5 years old at the time of this review.

What Could Use Improvement

- N/A; I didn't have any issues with the seller or the service.

Here is my review of the high tier package (DA 40 to 50).

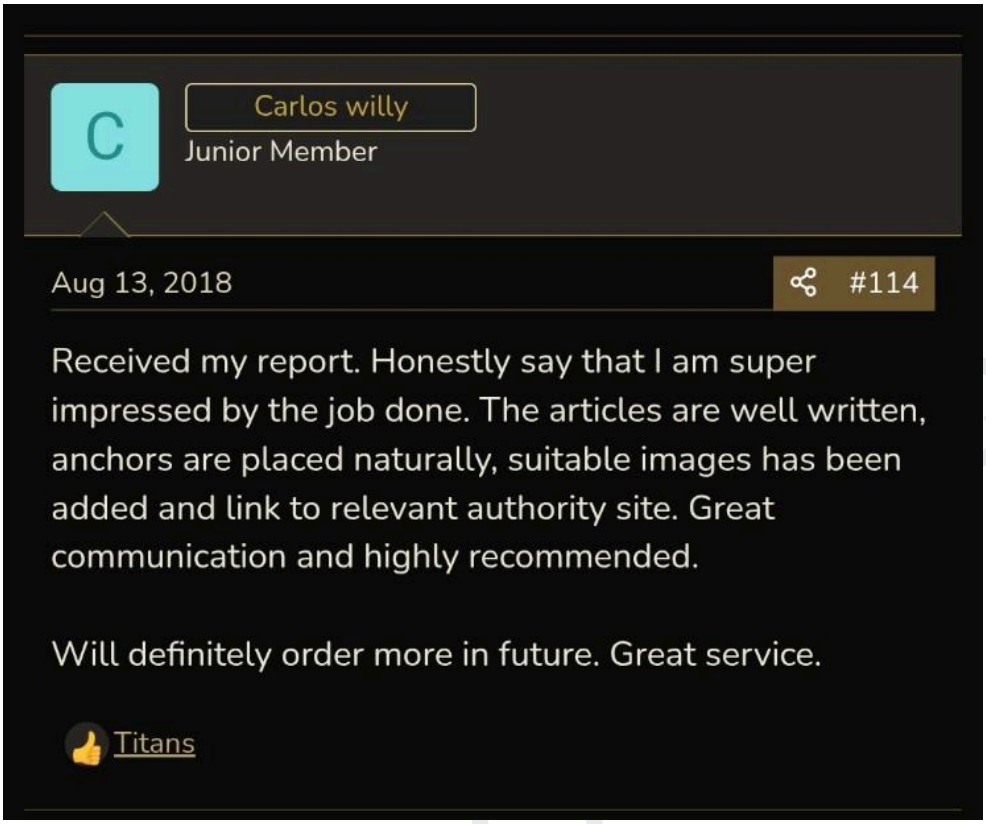

Metrics:
DA - 51
PA - 49
Moz Spam Score - 0
TF - 40
CF - 42
These metrics are solid, especially the TF and CF!

Quality of website:
The website was highly relevant with my niche and has been around since 2005 according to the Wayback Machine. It also boasts 57% search traffic and 5% referral traffic according to Similar Web which shows that the site gets natural traffic. The site also does not have a lot of other guest posts which is nice.

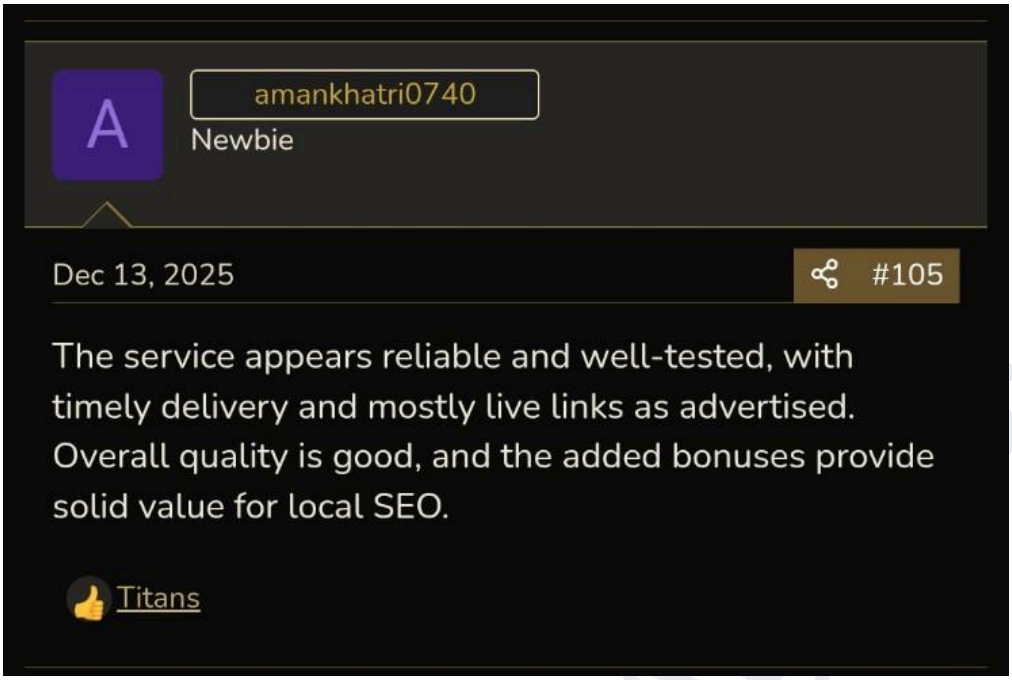

Quality of content:
The post was very well researched and written. It is original work according to Copyscape.

Overall I am happy with this guest post and would recommended this service based on my experience.

Ordered mid-december and AS ALWAYS, the work was completed faster thean the TAT provided (I'm actually a little slow in posting my opinion on the results).. the work was solid, better than most venders I've used in the past.. and the results were equal to or potentially better than expected... so much so, I ordered a package of the RAGGING RESULTS links from them (if you don't know about them check it out on here)... great work and communication every time..! Thanks Titans!
