

Google Summer of Code

Vert.x MQTT Client

Student : *Pavel Drankov*

Mentor : *Paolo Patierno*

Over the past few months, I have been working on Vert.x MQTT Client and here i want to share the information about my contribution.

First of all, initial work on Vert.x MQTT client was in [vert-x3/vertx-mqtt-client](#) repository and then it was moved to [vert-x3/vertx-mqtt](#) repository. So when it comes to commits and code, here is a links to all code i produced as a part of the project:

- <https://github.com/vert-x3/vertx-mqtt/pulls?utf8=%E2%9C%93&q=is%3Apr%20is%3Aclosed%20author%3ASammers21%20is%3Amerged>
- <https://github.com/vert-x3/vertx-mqtt-client/pulls?q=is%3Apr+is%3Aclosed+is%3Amerged+author%3ASammers21>

One more thing is my blog, here is a link to all posts dedicated to Google Summer of Code: <https://sammersblog.github.io/category/gsoc.html>. One of them was republished in Vert.x blog: <http://vertx.io/blog/introducing-vert-x-mqtt-client/>.

There are also a project called [vert-x3/vertx-examples](#) where you can find examples of usage from all project around Vert.x and vertx-mqtt is not exception. Actually, I have contributed a several examples related to Vert.x MQTT client. Here is Pull Request for that: <https://github.com/vert-x3/vertx-examples/pull/220>.
