Professional Experience

CLOUD DEVSECOPS TECHNICAL LEADER

Softserve Inc, Canada, 07.2023 – Present

Building a SaaS solution for Canadian mining companies.

- Introduced and integrated Prisma Cloud on the Project, Configured Gitlab CI and Azure Infrastructure.
- Onboarded development teams and guided tooling utilization. Established operational processes.
- Solved security issues across the products and services while being the security champion on the team.
- Represented customers in communication and negotiation with Palo Alto and Microsoft stakeholders.

GCP/AZURE DEVOPS TECHNICAL LEADER

SoftServe Inc, Ukraine/Colombia/Mexico, 10.2020 – 06. 2023

Infrastructure migration from GCP to Azure for the Canadian mining company.

- Built architecture and design for the Azure landing zones from scratch.
- Facilitated stakeholder communication and solution negotiations.
- Built and led a distributed team of up to 17 DevOps Engineers.
- Executed the role of DevOps Network Lead for SoftServe's Software Development Office.

DEVOPS

SoftServe Inc, Ukraine/USA, 09.2015 – 09.2020

Project 1: Presales and Discovery.

- Contributed to presales for Big Data and Machine Learning projects, which brought new customers to the company.
- Executed discovery phase on the customer side; directly collaborated with stakeholders and performed regular consulting activities.

Project 2: Migrating from monolith to the microservices architecture for the US Healthcare company.

- Led and managed a team of 15 DevOps as a Technical Lead and Scrum Master remotely and on-site.
- Built infrastructure from scratch in AWS using best practices (IaC, DevOps, SDLC).
- Migrated all workloads from old AWS infrastructure, which optimized customer cloud expenses by 60%.
- Created successful POCs with an Architecture vision for further implementation.

Project 3: Migrating monitoring service from On-premise to GCP for the US ERP software company.

- Created GCP infrastructure with IaC and automated SDLC process.
- Completed knowledge sharing with the customer and performed team coaching.

Project 4: An educational platform for collaboration between parents and teachers for an EU company.

- Created AWS infrastructure for the SaaS solution.
- Automated deployment processes.
- Configured autoscaling for the peaks to streamline the onboarding of the new users.

Project 5: Truck delivery tracking. Booking service for truck delivery for the US company.

- Migrated workloads from the Private Cloud in Rackspace to AWS, which helped significantly save cloud costs.
- Automated code testing and delivery.

Project 6: Cloud-based documents and email management system for the US company.

- Created and presented a successful PoC in Azure and contributed to the decision-making process regarding migration from Hyper V to the Cloud.
- Introduced Chef for VM provisioning.
