Completing the Annual Student Demographic Update

At the start of every school year, the District asks parents to complete the Annual Student Demographic Update. The digital form, accessed from within the PowerSchool Parent Portal, ensures your child's school has the current contact information for you and others responsible for caring for your child in the event of an emergency.

If you (or another parent) have not already logged into the PowerSchool Parent Portal to complete the Annual Student Demographic Update for your student(s), we ask that you please do so by Friday, September 30, 2022.

Important. You will get a "Snapcode error" message if the Annual Student Demographic Update form has been **started** (but not completed) by another parent. You will get a "Next Steps" message if the Annual Student Demographic Update form has already been submitted.

Click here for more information about obtaining a PowerSchool Parent Portal Account.
