

Subject line : How I kicked off my Tiktok account with a BANG!

3 Months ago I was trying to get my tiktok account started

Not just “started” like every other account

But kick it off into something special, that has 1000’s of raving fans

Sadly, no matter what I tried, all the “Tips and tricks” were failing me

I had no real followers, no clear plan and my account looked a bit weird

Honestly, I felt embarrassed to even call it mine.

Fast forward to today however,

My account has thousands of followers who enjoy my content

And I consistently gain hundreds of followers everyday

The best part, I’m really proud to call the account mine.

However, there is a downside to all this :

My entire social circle wants a piece of the “Clout” now

So I decided to show them step by step how to launch their own account and gain their first 1000 followers

You can access the same “A - Z” steps i taught them

[Through my TikTok starter pack](#)

P.S It includes my weird hashtag strategy that grew my account by over 52,000 followers in less than a month!
