

GCF Alumni Night

Friday, April 13th 7:30 pm in Owu room, Sidney-Pacific
(Come at 7 pm for pizza!)

Marcus Gibson

Marcus obtained his PhD in Inorganic Chemistry in 2015. After a two and a half year postdoc at Princeton University, he is now working in the area as a formulations scientist at Omega Therapeutics. He first contacted GCF when visiting MIT to check out the graduate program. He was invited to to GCF outing to Shakespeare on the common on his second day in Boston. Ultimately he became a member of the Tang Small Group.

Stephanie Lam

Stephanie graduated in 2016 with a PhD in biological chemistry. She (initially reluctantly) joined GCF with several of her friends (including Marcus!) in her first year, and together participated in creating a vibrant faith community. She is currently living in the area as a postdoctoral researcher in mitochondrial biology at MGH.

Po-Ru Loh

Po-Ru graduated in 2013 from the Applied Math program. He joined GCF through the SP bible study, which he might have heard about at Activities Midway, though he cannot quite remember. He is now a faculty member at Brigham and Women's Hospital / Harvard Medical School. He says he hasn't been able to bring himself to leave Boston since arriving in 2007 and getting to know GCF-ers.

Gerald Pho

Gerald graduated from the department of Brain and Cognitive Sciences (BCS) in April, 2017. He first got to know GCFers in his first year, but decided to serve at his local church for two years instead. However he felt the pull of serving with others at MIT, and returned to GCF in his fourth year, the community where he has developed many deep and enduring friendships through serving Christ together. He is now a postdoctoral researcher at Harvard, continuing his studies in neuroscience.

Frank Yaul

Frank obtained his PhD in Electrical Engineering in 2016. He is working at Analog Devices doing microchip design, but he can still be seen hanging around his small group in Sidney-Pacific. He also likes to organize occasional bike trips for his friends. He joined GCF in 2012 in his second year of grad school.
