“Encanto”

[...] While many waits to see if – or rather, when – the studio will stumble once more, it absolutely won’t be with this year’s “Encanto,” one of the most aesthetically arresting and epically emotional animated features of the year, complete with a cast of colorful and captivating characters who are sure to become new fan favorites.

As introduced in the invigorating opening number “The Family Madrigal,” “Encanto” follows this tight-knit clan who live in an enchanted enclave in the mountains of Colombia, giving back to their community thanks to their magical gifts that have been passed down ever since Abuela Madrigal (María Cecilia Botero) and the late Abuelo Madrigal made the trek to this town many years ago. Abuela’s daughters, Pepa (Carolina Gaitán) and Julieta (Angie Cepeda) can control the weather and heal others with her cooking, respectively. In contrast, Julieta’s own daughters are blessed as well, with the idealized Isabela (Diane Guerrero) able to make flowers bloom wherever she wishes and the lively Luisa (Jessica Darrow) possessing superhuman strength. However, there is one exception amongst the “magical Madrigals” – Julieta’s other daughter, Mirabel (Stephanie Beatriz), who sadly was not given a gift when she came of age. And yet, when it’s revealed that the Madrigal family’s magic is under threat and Mirabel may be the secret to saving it, she has to summon the skills to let her self-doubt dissipate and find a way to protect their powers before it’s too late. Two-Headed Tortoise Janus Celebrates 25th Birthday

Any 25th birthday is a cause for celebration. But it was even more so for Janus, a two-headed Greek tortoise¹ who marked the milestone year on September 3, 2022. The resident of the Natural History Museum in Geneva, Switzerland, is now believed to be the world's oldest two-headed tortoise. The museum celebrated the special occasion with a day-long party filled with fun events, which included taking photos with the birthday "boy".

In the wild, Greek tortoises (Testudo graeca) can live up to two hundred years in their natural habitat. However, two-headed tortoises, like Janus, usually do not survive for that long. Unlike normal tortoises, the reptiles are unable to retract their two heads into their shell, making them highly vulnerable to predators.

Janus, who has spent his entire life at the museum, faces no such danger. But life is not without challenges for the two-headed tortoise who also has two hearts and two pairs of lungs². Each head controls the front and back legs on its side of the body. This can lead to confusion when the two heads decide to go in different directions. Angelica Bourgoïn, Janus's lead caregiver, says, "The right head is more curious, more awake³, it has a much stronger personality. The left head is more passive and loves to eat". [...]

Fortunately, Janus has a staff dedicated to ensuring he lives a long and healthy life. The pampered tortoise receives a daily massage and is bathed in a green tea and chamomile extract solution. He eats a special diet of organic fruits and vegetables, keeps active with walks, and rides on his custom skateboard. Bourgoïn even talks to the turtle and plays soothing music to wake him from his slumber! With such loving care, the two-headed tortoise will surely continue to shatter⁴ many more records for longevity. Happy Birthday, Janus!

*Vocabulário:

¹two-headed Greek tortoise: tartaruga grega de duas cabeças.

²lungs: pulmões.

³awake: desperta.

⁴shatter: quebrar.

4th Of July Fireworks

It's that time of year again
We're nearing the 4th of July
Nothing quite as pretty
As sparks against the sky

And that is what it means
Freedom it represents for us
A day to set aside
And to make a lot of fuss

We honor our independence
It's what we have always fought for
And even though it's never easy
To keep the enemies from our door

So picnics and bar-b-q's are planned
To celebrate this special day
But stop a moment and remember
