## College and Career Readiness for Elementary Students

College and Career Readiness begins in Kindergarten! It is never too early to begin planting the seeds of excitement and curiosity for a child's future. Most children will naturally change their minds a lot throughout their formative years about their career interests. Embrace this and use this time to have discussions with your student and to learn about your student's interests.

What Parents/Families Can Do:

- Help your student become a reader.
  - Read to and/or with your student every day.
- Monitor your student's progress in school.
  - Talk to your student about what they are learning in school and their feelings about the subjects.
  - Prioritize education in your home by promoting good attendance and through discussions about the importance of school.
- Encourage your student to be curious.
  - Motivate your student to explore their natural curiosities outside of school by spending time in nature, going to the library, watching movies, and finding community activities.
- Talk to your student about possible career paths.
  - Students should see themselves with endless possibilities.
  - Discuss what is needed for certain careers (educationally, skills, etc.)
