

Plugin Name: Warps

Plugin Should Work For: Paper & Spigot 1.14.x+

Payment: Vouch Copy - Free

Timeframe: 1 Day

Plugin Features Overview:

- Creating warps, deleting warps, and listing them.
- [Warp] signs like in EssentialsX. When a warp sign is created, it will automatically change the color of the first line to &1.

All warp information should be stored in one file.

Commands: (Not CaSe-SenSiTiVe)

`/setwarp <warpName>` - Creates a warp if player has permission. Player **cannot** overwrite an already created warp name. They must first delete the old one. (Warps.warp.create)

`/delwarp <warpName>` - Allows deleting a warp. (Warps.warp.delete)

`/warp` | `/warps` - Allows listing all warps. (Warps.warp.list)

`/warp <warpName>` - Allows warping to a warp. (Warps.warp.use)

Permissions:

Warps.sign.create - Allows creating [Warp] signs.

Warps.sign.break - Allows breaking [Warp] signs. (They can break blocks the sign is placed on but not a big deal).

Warps.sign.use - Allows using all [Warp] signs.

Warps.warp.create - Allows creating warps.

Warps.warp.delete - Allows deleting warps.

Warps.warp.use - Allows warping to any warp.

Warps.warp.list - Allows listing all warps (like in EssentialsX)

NOTE: Plugin does **NOT** support the following - (Use `/cmi warp <warpName> [playerName]` for interactive commands instead.)

`/warp <warpName> <playerName>` - Allows warping other players to a warp
(Warps.warp.other.player)
