Afghanistan:

Mission Statement: WAW is a grassroots organization empowering Afghan women and girls in both Afghanistan and the U.S. to realize their full potential and advocate for their rights, while challenging societal norms to create lasting change and advance gender equality. We accomplish our mission through: https://womenforafghanwomen.org/

Mission Statement: The Taliban is going door-to-door in search of women's rights activists. These women fear that they and their families will be assassinated. Immediate action must be taken to safeguard Afghan women most at risk: women's rights activists, journalists, educators, civil society leaders, human rights defenders and direct service providers.

"For decades, Vital Voices has invested in women leaders solving the world's greatest challenges. We know that Afghan women have been on the frontlines, risking their lives for progress. Vital Voices and our entire global network stand firmly behind these courageous leaders – we must act now to protect and defend them." – Alyse Nelson, President & CEO, Vital Voices Global Partnership

Our voices are powerful alone, but unstoppable together. Please help amplify these vital voices and join us in our emergency efforts now. Call on the administration to act immediately to protect and support Afghan women, and urge others to join us. Be a part of this group and lend your voice in support of the women and girls in Afghanistan. https://www.vitalvoices.org/afghanwomensfund/

International Women's Aid:

Mission Statement: Become a Sister Supporter to get matched with an individual woman in our *Stronger Women, Stronger Nations* program. You'll discover her name, her country, and you'll even have the opportunity to send her messages of support through our online Supporter Portal. Your sister will develop essential skills to help her strengthen her own voice, forge her future, and share her newfound skills with her community.

Palestine GoFundMes:

Nebal Mansour is one of my good friends and currently stuck in Gaza with her family of 10. They have lived through this genocide and are in need of financial support for basic human rights such as food and housing. Please consider donating to her, I know it says there is already over 7k raised, but all of that has already been sent to her and used. I love her so much and feel like I am failing her with the lack of recent donations or traction on her campaign.
