Warning: The second part of the truth about how Elon Musk has a mastermind focus

1 simple reason Elon Musk has mastermind focus is because he doesn't listen to these youtube productivity 'gurus' and neither should you,

That's all there is right? Wrong, there is also a core reason why he has been able to focus and achieve his billionaire wealth and status,

Imagine being able to sit down and focus for hours, the smell of your favourite food can't even take your bulletproof focus away

When you hear a colleague or somebody making a racket you normally get pissed off but it would just fly past you like a bullet train going 199mph.

Or would you rather that racket hit and obliterate you like a bullet train hitting you at 199mph

Of course not so heres Elons second truth click [here](#)

Here you await a 3rd message from me that reveals the **most important** 'focus tool' that he uses
