**What You're Getting Here is Speed**

**The speed that allows tweets to go viral in your first couple of months on Twitter.**

Access to the network that would usually take you **tens of thousands of followers to reach**.

**The sales tactics that turn your “I have no clients” problem into a “I can only take 1 more this quarter” problem.**

*Because why would you spend months figuring it out when the game has already been figured out?*

This isn't a sport.

You don't need 10,000 reps to get something right.

**There are proven frameworks that build accounts, networks, and bank accounts faster than what you've been trying.**

This is why newbie accounts sometimes do better than big accounts. (Chances are you've seen some and they're part of this community already).

They're told what works and they apply it.

**It's that simple.**

**Here's what's inside:**

**1. Monthly Letters on what to tweet for maximum engagement**

These formats are tested and are currently only available to writers in my ghostwriting agency. We get paid \$25,000 to follow them **(\$29 value)**

**2. My every move to end up selling Tweet Hunter for \$4 Million someday**

I don't include these on Twitter (for obvious reasons) **(\$797 value)**

**3. Sensitive growth strategies**

Engagement groups, retweets, ads, sponsorships, and Twitter algorithm. You won't find this information anywhere else. **(\$997 value)**

**4. Twitter accountability group**

Never miss a day and actually get to a point where your account sets you financially free. **(\$397 value)**

**5. Monthly calls with JK and your favorite Twitter Brands**

Ask us anything about your business. We'll stay there until your specific case is solved. It's like coaching. **(\$4,997 value)**

**6. 24/7 support**

### **What if I'm a beginner?**

result:

#### **Landed the first client in 30 days and got 2 in the pipeline**

With just 2 hours per day learning and implementing, @MindFilesMF landed his first client while building his business in his spare time. His \$10 investment turned into \$2200 next month

### **What if I have 0 followers?**

result:

#### **Grew by 1690 followers in 54 days**

The first 1k is the most challenging one. Some people spend months (or even years) hitting it. And eventually, quit. But it's possible to get couple thousands of followers in 2 months

### **Can I grow my account faster?**

result:

#### **5k followers in 2 weeks**

Yes. I grew my second account, Best Ads of All Time by 5k in 2 weeks and by 34k in 2 months to that prove people are overcomplicating it.

### **What if I already have a business?**

result:

#### **Landed a conversation with a 10 figure brand in 2 weeks building in public**

Even better. You already have an offer. Twitter will become your traffic. You will build connections and leverage to scale.
