

Default 'Data Type' is Text

The screenshot shows the 'SysFieldMapping' application interface. On the left is a 'Form Settings' sidebar with a tree view containing: Form Formats, Settings, Edit Fields, Fields positioning, Unique Key, Toolbar, Export, SQL, Sorting, Group Label, Procedures, JavaScript, Dependencies, Security, Log, and Fields. The 'Fields' folder is expanded, showing 'AB fieldname' (selected), 'AB value', 'AB short_desc', and 'AB long_desc'. The main panel is titled 'General Settings: fieldname' and contains a table with the following attributes and values:

Attribute	Value
Data Type	Text
Label	Fieldname
Watermark	
Initial Value (type)	
Width	20
Validation Image	☐ Yes ☒ No
Password Field	☐ Yes ☒ No
Save Variable	☐ Yes ☒ No
Variable Name	
Grid Mask	

Fieldname is searchable

The screenshot shows the 'Editing - sys_fieldmap' window. At the top, there is a search bar containing 'ADDRESS_TYI' and an 'X' icon, an 'Add New' button, and an 'Exit' button. The date '08/24/2014' is displayed in the top right corner. Below the search bar is a table with the following columns: Fieldname *, Value *, Short Desc, Long Desc, Active, and Order By. The table contains three rows of data:

	Fieldname *	Value *	Short Desc	Long Desc	Active	Order By
	ADDRESS_TYPE	H	home addr	home addresses	1	10
	ADDRESS_TYPE	M	mail addr	mailing addr	1	20
	ADDRESS_TYPE	O	office add	office address	1	30

Below the table, there is a red asterisk and the text '* Required field'. At the bottom, there is a 'Go to' button, a 'View' button with a dropdown set to '10', and a set of navigation buttons (back, previous, 1, next, forward). The page number '[1 to 3 of 3]' is displayed in the bottom right corner.

Modified 'fieldname' to data type 'Select' and input following

The screenshot shows the '20140824SysFieldMapping' application interface. On the left is a 'Form Settings' sidebar with a tree view containing categories like Form Formats, Settings, Edit Fields, Fields positioning, Unique Key, Toolbar, Export, SQL, Sorting, Group Label, Procedures, JavaScript, Dependencies, Security, Log, Fields, Layout, Events, and Ajax Events. The 'Fields' category is expanded, showing a list of fields including 'fieldname', 'AB value', 'AB short_desc', 'AB long_desc', 'AB active', '12 order_by', and a 'New Field' button. The main area displays the configuration for the 'fieldname' field. It includes settings for 'Hidden Field' (radio buttons for Yes/No, with 'No' selected), 'Disabled Field' (a dropdown menu set to 'No'), 'HTML Type' (set to 'SELECT'), and 'SQL Type' (set to 'VARCHAR'). Below these are 'Database value' settings for 'Insert' and 'Value in Database (Update)', each with a dropdown menu. A 'Lookup Settings' section follows, featuring a 'Lookup Method' dropdown set to 'Automatic' and a text area for the 'SQL Select Statement' containing a query to select distinct column names from an information schema table. A 'Create Select' link is located at the bottom right of the SQL statement area.

Fieldname is not searchable

The screenshot shows the 'Editing - sys_fieldmap' application interface. At the top, it displays 'Editing - sys_fieldmap' and the date '08/24/2014'. Below this is a search bar containing 'ADDRESS_TYI' and an 'X' icon, with 'Add New' and 'Exit' buttons. A table with columns 'Fieldname *', 'Value *', 'Short Desc', 'Long Desc', 'Active', and 'Order By' is shown. Below the table, it states 'Records not found'. A red asterisk indicates a 'Required field'. At the bottom, there is a 'Go to' button, a text input field, a 'View' dropdown set to '10', and navigation buttons (back, forward, first, last).

Work exactly fine without search keyword

I think it's because delivered search only focus on master table's content, rather than the references description from other table.

How to get rid of this?
