

Privacy Policy for Zonar WindoorCraft Extractor

Effective date: August 11, 2026

This Privacy Policy describes how the Zonar WindoorCraft Extractor Chrome extension (“the Extension”) collects, uses, stores, and shares information when you use it.

1. Who we are

The Extension is provided to connect WindoorCraft printer pages with your Zonar ERP instance so you can create quotations from production-order data.

2. What the Extension does

The Extension:

- Reads production-order content from WindoorCraft printer pages you open
- Lets you sign in to your Zonar ERP using OAuth
- Sends extracted order data to your Zonar ERP to create quotations

3. Information we collect and process

Depending on how you use the Extension, the following may be processed:

a) Account and authentication data

- Zonar base URL you enter
- OAuth access and refresh tokens
- Basic account details returned by Zonar (such as user, business, username, locations, and capabilities)

b) Contact and quotation-related data

- Contact details looked up or selected in Zonar (for example contact id, name, business name, mobile)
- Selected location / warehouse id
- Extracted WindoorCraft production-order content (customer/contract/order details, line items, sizes, colors, profiles, glass, accessories, drawing references)

c) Website content

- Content from WindoorCraft printer pages matching `*://*.windoorcraft.com/printer*` that is needed to extract production orders

We do not intentionally collect health information, financial payment card data, or browsing history unrelated to this purpose.

4. How information is used

Information is used only to:

- Authenticate you with your Zonar ERP
- Extract production-order data from WindoorCraft
- Preview and create quotations in your Zonar ERP
- Remember your connection settings (base URL, tokens, selected location/contact)

5. Where data is stored and sent

- Locally in your browser via chrome.storage.local (settings, tokens, and related session data)
- To the Zonar ERP base URL you configure, over HTTPS when available, for OAuth and quotation APIs
- To WindoorCraft only as needed to read the printer page you already opened

The Extension does not sell your data and does not use it for advertising.

6. Third parties

- Zonar ERP: receives authentication and quotation data so the service can work for your account
- WindoorCraft: page content is read in your browser; the Extension does not send that content to unrelated third parties

We do not use third-party analytics SDKs in the Extension.

7. Data retention

- Data stored in chrome.storage.local remains until you log out, clear extension storage, or uninstall the Extension
- Logging out clears tokens but may keep your saved Zonar base URL
- Data sent to your Zonar ERP is retained according to that Zonar instance's own policies

8. Your choices

You can:

- Disconnect / log out from the Extension popup
- Revoke host access for a Zonar origin in Chrome extension settings
- Uninstall the Extension to remove local extension storage
- Manage or delete data stored in your Zonar ERP through that system's admin/support channels

9. Security

We use OAuth (PKCE) for login and store tokens in Chrome's extension storage. You should only connect to trusted Zonar URLs and keep your browser and account secure.

10. Children's privacy

The Extension is intended for business users and is not directed at children.

11. Changes

We may update this Privacy Policy when the Extension's data practices change. The effective date above will be revised when changes are posted.

12. Contact

For privacy questions about this Extension, contact: contact@zeekoi.com
