

PRIVACY POLICY — US PASSPORT PHOTO

Last updated: July 24, 2026

This Privacy Policy describes how the developer of US Passport Photo ("we", "us", or "our") handles information when you use the US Passport Photo mobile application ("App"), package name com.manthan.passpix, available on Google Play.

By using the App, you agree to this Privacy Policy. If you do not agree, please do not use the App.

1. SUMMARY

US Passport Photo helps you create US online passport renewal-style ID photos on your device. Pick, crop, adjust, and export work offline. We do not require an account, and we do not operate a backend server that stores your face photos.

Photos and History stay on your phone. The App may show third-party advertisements through Google AdMob. Ads need a network connection when they are shown; your face photo is not uploaded by us for processing.

2. INFORMATION WE STORE ON YOUR DEVICE

The App stores the following data locally using on-device storage (AsyncStorage) and app-private files:

- History of exported photos: file path in app storage, creation time, byte size, and dimensions
- Working copies of images you pick or capture while preparing a renewal photo (temporary app-owned files)
- App settings: theme (dark / light), haptics on/off, and an ads-removed flag used only if you unlock ad removal in a future build

You can remove History items in the App. You can clear all App storage in Android settings or by uninstalling the App.

3. PHOTOS AND EXPORTS

- Camera or gallery images you choose are copied into app-owned storage for crop, adjust, and export.
- Exported JPEGs you save to the gallery are written with the save-to-gallery permission you grant.
- Share and print-sheet PDF use the system share sheet or print flow; files leave the App only when you choose a share or print target.

- On-device face/framing checks run locally on your device. We do not upload your face photos to our servers. We do not provide cloud backup of your passport photos.

4. DEVICE PERMISSIONS

The App may request:

- Camera: to take a photo for a renewal export. You can deny this and still pick from the gallery.
- Save photos / media library (write): to save the finished JPEG to your gallery when you choose Save.
- Internet / network: used by Google AdMob when ads are shown. Core photo tools do not require the network.

The App uses the Android Photo Picker for gallery selection where available and does not request broad READ_MEDIA_* photo library access. Microphone recording is not used.

5. THIRD-PARTY SERVICES — GOOGLE ADMOB

The App uses Google AdMob to show advertisements, including:

- App-open ads
- Interstitial ads (for example after some tab presses)
- Rewarded video ads before save, share, or PDF actions (best-effort; save/share/PDF may still continue if an ad is skipped or fails)

Banner ads are not used in the current build.

Google may collect and process information such as advertising identifiers, device and app information, IP address, and interaction with ads, according to Google's policies.

- Google Privacy Policy: <https://policies.google.com/privacy>
- How Google uses data in apps: <https://policies.google.com/technologies/partner-sites>
- AdMob: <https://support.google.com/admob/answer/6128543>

We do not sell your personal information. Ad networks may use identifiers for interest-based advertising subject to your device and Google account settings.

6. CHILDREN'S PRIVACY

The App is not directed at children under 13. We do not knowingly collect personal information from children.

7. DATA RETENTION AND DELETION

- Local History and settings: delete History items in the App, clear App storage in Android settings, or uninstall the App.
- Gallery copies you saved remain under your control in the device gallery.

Because we do not host your photos on our servers, there is no cloud photo account to delete with us.

8. CHANGES TO THIS POLICY

We may update this Privacy Policy from time to time. The "Last updated" date at the top will change when we do. Continued use of the App after changes means you accept the updated policy.

9. CONTACT

For privacy questions about this App, contact the developer through the email address listed on the Google Play store listing for US Passport Photo (photographywithdc@gmail.com).
