Mini Video Solo

For this mini-project, you are going to produce a video on your own. In order to contribute to the broadcasts, you need to have basic video skills. This project helps me push you a little and also assess your skills.

Everyone, no matter what your level, should strive to get better at video production.

It must contain:

- An image of everyone in the class--with their names …
- Eight of these shots (filmed by you with your phone) …
- Observe the Rule of Thirds …
- Footage you took and put in the Shared Drive …
- Someone else's footage from the Shared Drive …
- Transitions …
- Text (names of classmates) …
- A still image from Google …
- Audio from The WeVideo Essentials Library or YouTube
- A Voice Over
- A Sound Effect from The WeVideo Essentials Library or YouTube
- Green Screen Effect from The WeVideo Essentials Library or YouTube

**Note: downloading YouTube clips is much easier at home

If this is all easy and you need a challenge…

Some Challenges:
- Two videos on-screen at once
- Your own Green Screen Image
- Clip adjustments
  - Slow/Fast Motion
  - Cropping
  - Resizing
  - Animation

Bigger Challenge: You could also have a storyline. Have your video contain your favorite (clean or bleep) joke being told. Or a possible topic: "If I had Three Wishes"--make them silly.
