

INSTRUCTIONS

1. Grab a 4096 x 4096 map. They're available everywhere.
2. Draw a 128 x 128 grid & number it like shown in this post ->
https://www.reddit.com/r/CompetitiveApex/comments/yk8b9p/broken_moon_loot_distribution_details/
3. Then [R3C4] will be Row 3 & Column 4. It'll have 5 loot spots, and 0 of everything else.

NOTE: Respawn has this weird thing in map files where Jumptowers are added twice on the same spot for some reason (on some maps). So my program counts it twice. I fixed it on Divided Moon & Storm Point manually because I know there's only 1 jumptower on both those maps. Everything else should be accurate.

Broken Moon

RowXColumnY, Lootspots, Lootbins, Respawn Beacon, Survey Beacon, Ring Console, Crafting, Trident, Gravity Cannon, Jumptower

Total items on Storm Point = Loot spots: 4280, Lootbins: 543, Respawn Beacons: 30, Survey Beacon: 22, Ring Console: 17, Crafting: 16, Trident: 10, Gravity Cannon: 39, Jumptower: 1

Olympus

NOTE: Olympus data is old from last season. Respawn hasn't added the Season 16 version of Olympus with Ring Consoles in the game yet (it's literally not shipped in the files due to a bug).

RowXColumnY, Lootspots, Lootbins, Respawn Beacon, Survey Beacon, Ring Console, Crafting, Trident, Gravity Cannon, Jumptower
