

CueCam – Frequently Asked Questions

Last updated: February 25, 2026

What does CueCam do?

CueCam is an all in one teleprompter and video creation app for iPhone. Write or paste your script, read it while recording yourself on camera, then edit your video with professional tools without leaving the app.

You can trim videos, add subtitles, replace backgrounds, resize for social media, and export directly to TikTok, Instagram, YouTube, or any platform.

How does the teleprompter work?

Your script scrolls on screen while the camera records you. The text appears near the camera lens so your audience will not notice you are reading, creating natural eye contact.

CueCam offers three scrolling modes so you can choose what feels most comfortable.

What are the three scrolling modes?

Mode	How it works	Best for
Word Tracking	Uses on device speech recognition to follow your voice word by word. Pause anytime and the script waits for you.	Natural delivery, conversational content
Fixed Speed	Scrolls at a constant speed you control with a slider.	Consistent pacing, scripted content
Timed Scrolling	Set a target duration and the script automatically paces itself to finish on time.	Time limited content and social media posts

How do I start recording?

1. Open CueCam and go to the **Session** tab
 2. Write a new script or select one from your Script Library
 3. Choose your teleprompter mode
 4. Tap the record button
 5. Read your script naturally
 6. Tap stop when finished
-

What camera settings are available?

Setting	Options
Resolution	720p (HD), 1080p (Full HD), 4K (Ultra HD)
Frame Rate	24, 25, 30, 48, 50, 60 FPS
Stabilization	Off, Auto, Standard, Cinematic, Cinematic Extended
Camera	Front or rear camera (switch anytime)
Audio	Built in microphone, external microphones, Bluetooth inputs

What editing tools are included?

CueCam includes a complete editing suite inside the app:

- **Trim**
Cut your video to keep only the best parts.
- **Auto Generate Subtitles**
Creates timed captions automatically using on device speech recognition.
- **Subtitle Editor**
Edit text, timing, and choose styles: Classic, Social, Minimal, or Neon.
- **Resize**
Export in 9:16, 16:9, 1:1, or 4:5 formats.
- **Replace Background**
Swap your background with any image.
- **Blur Background**
Add depth of field for a professional look.
- **Watermark**
Add your logo or brand.

- **Mirror**
Flip video horizontally.
 - **Clean Audio**
Reduce background noise.
 - **Intro & Outro**
Add polished opening and closing sequences.
-

How do auto generated subtitles work?

CueCam uses Apple's on device speech recognition to analyze audio and generate timed subtitles automatically.

Key advantages:

- Fully on device processing
 - No internet required
 - Your audio never leaves your phone
 - Editable word by word
 - Multiple visual styles available
-

What languages are supported for subtitles?

CueCam supports all languages available through Apple's on device speech recognition, including English, Spanish, French, German, Portuguese, Chinese, Japanese, Korean, Arabic, Hindi, and many more.

The exact list depends on your device and iOS version.

What export formats and platforms are supported?

Aspect Ratio	Use Case
9:16	TikTok, Instagram Reels, YouTube Shorts
16:9	YouTube, presentations
1:1	Instagram feed, Facebook

Videos are saved to your photo library and can be shared directly to any app on your device.

How do I manage my scripts?

CueCam includes a built in Script Library where you can:

- Write and edit scripts
 - Save scripts for future recordings
 - Organize all content in one place
 - Start recording instantly from any saved script
-

Do I need an internet connection?

Most features work completely offline.

Recording, teleprompter scrolling, speech recognition, subtitle generation, and editing all run directly on your device.

Internet is only occasionally required for:

- Subscription verification
 - App updates
-

How does the subscription work?

CueCam offers a subscription with a free trial that gives full access to all features.

Payments are processed securely by Apple through the App Store. You can manage or cancel anytime in:

iPhone Settings → Apple ID → Subscriptions

Will I be charged during the free trial?

No. The free trial gives full access at no cost. Charges only occur after the trial ends if the subscription remains active.

A reminder notification is sent before the trial expires.

How do I cancel my subscription?

1. Open **iPhone Settings**
2. Tap your Apple ID
3. Tap **Subscriptions**
4. Select CueCam
5. Tap **Cancel Subscription**

Access continues until the end of the billing period.

Is my content private?

Yes. Privacy is a core principle of CueCam.

- All processing happens on device
- Scripts, recordings, and edits never leave your phone
- Speech recognition runs locally
- No accounts required
- No personal data collection
- We do not sell or analyze your content

See the full Privacy Policy inside the app under Settings → Support.

Tips for better teleprompter recordings

- Practice your script once before recording
- Use Word Tracking mode for natural pacing
- Position your phone at eye level
- Increase font size for easier reading
- Record in a quiet environment
- Use the front camera for better eye contact
- Do not aim for perfection, you can trim later

The speech recognition is not tracking correctly

Try the following:

- Speak clearly at a moderate pace
- Reduce background noise
- Check that the microphone is not blocked
- Disable external audio devices if needed
- Switch to another scrolling mode

My subtitles have errors. Can I fix them?

Yes. In the Subtitle Editor you can:

- Edit text
- Adjust timing
- Change styles
- Reposition captions

A quick review ensures professional results.

My video looks shaky

Enable **Cinematic** or **Cinematic Extended** stabilization in Camera Settings for smoother footage. Strong stabilization may slightly crop the frame.

How do I restore my subscription on a new device?

- Sign into the same Apple ID
- Open CueCam
- Subscription restores automatically

If not, contact support.

Need help?

Email **support@megacubos.com** with:

- A description of your issue
- Device model and iOS version
- Screenshots if applicable

We typically respond within 24 to 48 hours.

About CueCam

CueCam is an all in one teleprompter and video creation app for creators, entrepreneurs, educators, and anyone who wants to look confident on camera.

Write your script, record with speech synced scrolling, edit professionally, and export anywhere directly from your iPhone.

Read naturally. Speak confidently.
