

Task 1: The Cardiovascular System - Overview

During your GCSE's you have covered the circulatory system (Revision materials can be found on [BBC Bitesize](#)). During your first few weeks we study the heart, lifestyles that impact upon the way it functions and ways of measuring its physiological parameters.

Task 1: Structure of the heart

Fill in the diagram

Note: Some research may be required to identify all the labels.

The outside of the heart has some other features not shown in this cross section. Watch [this video](#) and make some notes on these other structures.
