

How to Create an FSA ID (your login to the FAFSA)

Note: You will need access to your social security number to create an FSA ID.

- 1) Visit:
<https://studentaid.gov/fsa-id/create-account/launch>
- 2) Select "Get Started" and follow the instructions
 - a) **KEY POINT 1:** Do not use your BPS email for this - use a personal email.
 - b) **KEY POINT 2:** Once you've created your FSA ID, store your login information in a safe place.
 - c) **KEY POINT 3:** You will need to set up at least one form of Multi-Factor Authentication (via phone, email or authentication app). It is highly recommended that you set up all forms of MFA and that you write down the one-time backup code.

At least one parent and possibly more will need to create an FSA-ID as well. Parents are called contributors on the FAFSA. Please consult [this link](#) to determine which parents will need to create FSA-IDs and serve as contributors for your FAFSA
