

FRAMESTORM

Purpose

What do you get when you combine the course frames and a brainstorm? A framestorm! It's time to think critically about the ways that the rise of communism impacted society. This will help you make meaning of all that you've learned about communism.

Process

1. Consider how the rise of communism affected communities, networks, and production and distribution. Brainstorm as many ideas as you can and record them in the table.

Communities	Networks	Production and distribution

2. Overall, which course frame seems most impacted by the rise of communism? Support your choice with evidence.
