2020-11-03 Dataverse Community Call

Dataverse Community Call 1 (2 AM UTC)

Dataverse Community Call 1 Agenda

- Dataverse 5.2
- GDCC Updates
- Community Questions

Dataverse Community Call 1 Attendees

- Danny Brooke (IQSS)
- Jim Myers (GDCC, QDR, TDL)
- Schusie Sun (NTU, Singapore)
- Marina Mcgale (ADA)

Dataverse Community Call 1 Notes

- Dataverse 5.2
  - Milestone, in progress https://github.com/IQSS/dataverse/milestone/92?closed=1
- GDCC Updates
  - Metadata Working Group
    - Google Drive folder: https://drive.google.com/drive/folders/1M5OaWdVcbGzFvJo3fVs2vvn7NjCT4VvK?usp=sharing - open to everyone on the dataverse-community@googlegroups.com mailer
    - Membership spreadsheet in that folder - add your name/email
    - Being on the spreadsheet will get you an invite to dataversecommunity.slack.com

- - - Also rsvp re: scheduling a standing meeting: https://doodle.com/poll/4e8i9bb5msd6wn33?utm_source=poll&utm_medium=link
  - - 3 starting topics - trying to keep focus on concrete goals while also understanding the larger picture of where everyone wants to go with metadataçç
    - Meetings will be a combo of short presentations on current ideas/work and use cases, and open discussion.
    - Hoping to have a core that can work outside meetings to drive plans and coordinate implementation
    - (Schusie) Will this be added to Dataverse or will it be the implementation of a new standard?
      - (Jim) Mostly additions to Dataverse, we can discuss more in the group
    - (Schusie) Are there any prerequisites for joining?
      - (Jim) No, but I have the documents set for permissions based on the Google Group
    - (Schusie) What's the expected time commitment?
      - (Jim) It can be different from week to week and topic to topic.
- Community Questions
- Schusie: We are on version 4.19. Clicking preview button would trigger downloads. From which version this issue has been solved? Anything particular we have to configure? Thanks.

  - The way to tell is to check the URL used. In 5.x, the call the previewer makes to get the data ends in gbrecs=true whereas a download ends with gbrecs=false. If the URL used for preview in 4.19 ends with gbrecs=false, the problem of counting it as a download is fixed in later versions. Looking further, the issue was actually in the previewers rather than Dataverse itself and was fixed with this commit in April 2019. If you are not using the preivewers hosted at gloabldataversecommunityconsoritum.github.io, you should update your code.
  - For Make Data Count, I think previews are still counted as 'requests' rather than 'investigations'. That is probably consistent with the specification as things that retrieve/use the data itself rather than the metadata are counted as requests (which we usually call downloads). If you/anyone thinks that the way the MDC counting works should be discussed/changed, I'd suggest putting in an issue.

Dataverse Community Call 2 (3 PM UTC)

Dataverse Community Call 2 Agenda

- Dataverse 5.2
- GDCC Updates
- Community Questions

Dataverse Community Call 2 Attendees

- Danny Brooke (IQSS)
- Gustavo Durand (IQSS)
- Christina Chan-Park (Baylor, TDR)
- Don Sizemore (Odum Institute)
- Sherry Lake (UVA - Yay, time change & I can make these meetings again!!)
- Jim Myers (GDCC, QDR, TDL)
- Jamie Jamison (UCLA)

Dataverse Community Call 2 Notes

- Dataverse 5.2
  - (Jamie) Is support for remote web stores included in 5.2?
    - (Danny) No - we want to look at this together with TRSAs, demo next week
    - (Jim) If there are comments we certainly welcome them on the PR - does this meet your use case? https://github.com/IQSS/dataverse/pull/7325
- GDCC Updates
  - Metadata Working Group
    - Google Drive folder: https://drive.google.com/drive/folders/1M5OaWdVcbGzFvJo3fVs2vvn7NjCT4VvK?usp=sharing - open to everyone on the dataverse-community@googlegroups.com mailer
    - Membership spreadsheet in that folder - add your name/email
    - Being on the spreadsheet will get you an invite to dataversecommunity.slack.com
    - Also rsvp re: scheduling a standing meeting: https://doodle.com/poll/4e8i9bb5msd6wn33?utm_source=poll&utm_medium=link
  - 3 starting topics - trying to keep focus on concrete goals while also understanding the larger picture of where everyone wants to go with metadata
  - Meetings will be a combo of short presentations on current ideas/work and use cases, and open discussion.
  - Hoping to have a core that can work outside meetings to drive plans and coordinate implementation
- Community Questions
  - No questions today!
