## **Minutes**

**As always, we started the site council by going over the current balance. The balance has not moved much since the last meeting. As families make contributions, it typically seems like it takes some time before it is reflected in the balance.**

**There was continued conversation about the PTO area. Last year there was an 8th grade gift that was going to be placed in that area as the first step of improving that area. Unfortunately this did not materialize. The plan is to halt on this and do something more comprehensive.**

**We are an A school for the second year in a row!!! This is a huge deal for our school and the council discussed both celebrations and promotion of this. The discussion was on the topic of getting two banners. One that we can display in the front of the school and one that will be displayed on the back of the school (Osborn and Indian School, respectively).**

**The council then shifted the conversation to the ongoing topic of revamping our school vision and mission. We discussed the input survey that was sent to staff and council members were also asked to fill it out. The response rate was not very high, but the data was very useful. We also reviewed some of the samples from student government's student written visions and missions.**

**Finally, the council received the updated campus improvement plan, which houses our goals for the school year. The council got a summary of what each goal is aiming to achieve.**
