

The following message was sent by email and text through Skylert.
November 10, 2020 1:37 pm

We have been informed of another individual who has tested positive and has been in our building. All potential contacts have been notified.

In an effort to limit the frequency of these communications, moving forward, you will only be contacted with COVID-19 related information if you are listed as a close contact to a positive individual.

Again, please keep in mind that this requires help from everyone.

1.
If your child is not feeling well or has symptoms, please keep them home. The most current guidance can be found here:
<https://www.co.chippewa.wi.us/government/public-health/covid-19-coronavirus-disease-2019/covid-19-testing-locations>
2.
Please transport your own children whenever possible. Our model has been very good at minimizing contacts at school with the exception of lunch, recess, and transportation. We knew those would be high-risk areas when we reopened and encouraged parents to transport their own children when possible.
3.
Please wear a mask when in public.

For weekly district-level information, please reference our COVID district dashboard. It can be found [here](#). Data will be updated each Friday.

Thank you for your continued support during this challenging time.

Jeff Koenig, District Administrator

Stanley-Boyd Area Schools
