🪽Content Creators for Rectifier: In Bloom🪽

Meant to Bee Studios is a romance visual novel/game studio.

🪽What *is* Rectifier: In Bloom🪽

Rectifier (and this side game Rectifier: In Bloom) **(for more info, check out our Itch.io page)** is a **high fantasy/adventure and romance visual novel**. Rectifier has you playing as a "Rectifier", essentially an Angel (with a customizable look and personality) whose job is to save humanity from themselves.

In Bloom plops you right in the middle of the action, while telling little mini-stories to introduce you to the world, the cast, and the gameplay of the full game that is in development. But Rectifier: In Bloom is a complete experience.

Follow your Rectifier as they travel the world of Aelyria with their 7 love interests, all loosely based on the seven deadly sins. Each route touches on important story elements that will be later expanded on, while you have some romantic moments with each.

Would you like to date a yandere priest, an old man, a wolf man, a half-demon, a pirate, a monster-loving bard, or a fallen Angel? Then this is the dating sim for you!

🪽What *You* Need To Know🪽

- **Sadly, this collaboration is unpaid.** However, you will receive the paid version of the game (valued at USD 5.99) for free!

- **Followers do not matter.**

- If you're chosen, you will receive a key as soon as you post about the game during that time.

- We will work with your needs and schedules.

- We'll provide you with any graphical assets needed, such as logos, screenshots, character sprites, etc.

- Content creators will be free to give their honest opinion about the game (unless it's harmful or offensive, of course). We value all constructive criticism, but bigotry and bullying, etc, **won't** be tolerated.

🪽Contact🪽
