Akvelon Inc.

Position: Senior iOS Software Development Engineer with Python experience

About us

Akvelon Inc. (USA) works in the field of software engineering based on a variety of technologies. Our company is a member of the vendor program, which gives employees the opportunity to work with clients in the United States and other countries (**Microsoft, Facebook, Airbnb, Dropbox, Pinterest,** and many others). This is a great opportunity to learn from and work with leading engineers of world-renowned companies.

About project

American social news aggregation, content rating, and discussion website. Also called "The front page of the internet," it brings over 430 up million people together each month through their common interests, inviting them to share, vote, comment, and create across thousands of communities. Come for the cats, stay for the empathy.

Mobile users are more than half of Client's traffic, and we are looking to invest in innovation within the mobile app. We are looking to launch new products that will continue to bring conversation and community to hundreds of millions of users.

We're passionate about developing scalable, well-designed software that improves people's lives globally. Join us and help build the future of popular social network!

Responsibilities

- Build experiences and create the patterns for Client's official iOS app that power localized experiences, help users engage with content, or deliver modern chat experiences;
- Partner across product, design, and engineering teams to innovate and implement sophisticated solutions to complex challenges;
- Participate in the full iOS development cycle: design, develop, QA, experiment, analyze, and deploy.

Work Schedule

- Overlapping till 12 pm PST daily is a must

Requirements

- Expertise in Swift/Objective-C with 3+ years of experience in iOS development
- Experience in Python or Golang within 2+ years of backend development
- Expertise in unit, integration, and end-to-end testing of iOS applications
- Experience with RxSwift or Combine
- Understanding of CI/CD infrastructure and operations using tools like Bitrise, Jenkins, or CircleCI
- Excellent communication skills. You must be able to collaborate effectively with teams in a fully remote environment and discuss complex topics with technical and non-technical audiences.
- Able to work effectively under schedule pressure to fix bugs, review code, design, write, test new code, and diagnose production issues.

Nice to have

- Experience working with GraphQL

Our benefits

- Paid vacation, sick leave
- Official state holidays
- Professional growth while attending challenging projects and the possibility to switch your role, master new technologies and skills with company support
- Flexible working schedule: 8 hours per day, 40 hours per week
- Personal Career Development Plan (CDP)
- Employee support program (Discount, Care, Heals, Legal compensation)
- Paid external training, conferences, and professional certification that meets the company's business goals
- Internal workshops & seminars
- Relocation support
