Company Description

Relationships are the backbone of the world's most valuable industries; they underlie business development, venture capital, philanthropy, government, and more. But actionable context about relationships remains hidden in the email and calendar streams of friends and colleagues. Affinity helps enterprises unlock the value of their network by capturing and structuring this exponentially growing stream of communications data.

At Affinity, you'll join a team of fewer than 10 where you'll be leading development of software products from day one. Our team includes Joe Lonsdale, who was inspired by his work at RelateIQ and Palantir, and several of Stanford's top engineers. Join us!

AIRMAP

Company Description

The emergence of small, powerful, and autonomous drones, is transforming society. Drones are being used for agriculture, public safety, aerial photography and cinematography, and soon, package delivery. The next century of aviation innovation is happening at the local level, not across oceans, and it's happening below 500 feet. AirMap is organizing this low altitude information so innovation can take flight.

Like to push the boundaries? So do we! We believe we're the next best thing (in FinTech) since sliced bread, and we're here to prove it. Join Align Commerce in revolutionizing the way payments move around the world.

Align Commerce uses the blockchain to level the playing field for small businesses in the payment space. We want to make sure that the little guy isn't left behind in the bank dust. Thus, we're here to serve small businesses with integrity, transparency and great customer service. Providing them the attention that large corporations get at the bank for their cross-border payments.

By improving the way small businesses handle overseas payments Align provides value to a 5 billion dollar underserved market. Are you along for the ride?

**Company Description**

Simply put, Chubbies are the best shorts out there. Comfortable, flexible, aerodynamic and most of all utterly Radical, Chubbies are everything a short should be and more. They are weekend BBQs in the sun. They are that perfect day on the beach. They are trampoline dodgeball and IM sports. They are radical mustaches and longboarding in Costa Rica. They go where no cargo shorts can go, and they do it in style. Don't take our word for it, though, try them out yourself. If you're not satisfied with your shorts' performance, just send 'em back. Simple as that. That's why we have such a lenient return policy - because Chubbies speak for themselves. It's time to take the plunge and join the shorts revolution with Chubbies. Your thighs will thank you.

Company Description

OmniTier Storage is a cloud storage solutions company developing cost effective, high performance, scalable and reliable distributed storage system solutions for modern large-scale data centers. Our products are in the area of hyper-converged infrastructure solutions. The company's technology focus is to deliver DRAM-like performance using Flash memory as a media tier within the storage system stack.

Unlike many of the emerging startups, our solutions are not Flash array or Hybrid array appliances. Our solutions comprise vertically and horizontally optimized software/card stacks for targeted applications within the modern data center hierarchy, such as distributed cache with distributed database, high capacity Object Store, etc..

Through vertical and horizontal optimization, our solutions deliver the best performance-TCO tradeoff and operation efficiency that is essential for modern data centers.

**Company Description**

Synack saw a need. Cyber criminals try to penetrate enterprise IT environments every day, armed with individual expertise and sophisticated tradecraft. Until now, no solution could protect the enterprise against this self-learning, evolutionary human threat. Synack built a solution that can.

Founded by former NSA security experts, Synack is disrupting a vastly growing \$120B industry, one that is now at the forefront of every executive's mind. Synack doesn't brag about our customer list, and we don't need to. Our success in building the next generation of enterprise grade cybersecurity is as equally rewarding as it is hard, and we make a point to celebrate our wins as a team.

On the heels of Synack raising over \$34 Million in capital from top-tier venture capital firms including Kleiner Perkins, Google Ventures and Greylock Partners, Synack is growing rapidly. We are seeking passionate and innovative people interested in being a part of a revolutionary team that's transforming vulnerability discovery standards for businesses around the world.

It's all hands on deck, it's hard work, it's winning, it's Synack. Join us!

- We work with the most promising companies in tech including five of the top ten on the Forbes list of hottest startups, as well as several companies here at the fair! Why work for just one when you can work across them all?
- We are the fastest growing executive search firm in the country, with plans to further expand both domestically and internationally in 2016.
- Volunteerism is near and dear to our hearts. In 2015 we planted trees, served meals to underserved communities, and adopted a family during the holidays.

**Company Description**

Our mission is to bring accessible, affordable, engaging, and highly effective higher education to the world. We believe that higher education is a basic human right, and we seek to empower our students to advance their education and careers.

-Our office is conveniently located by the downtown SF Caltrain station.

**Company Description**

Xamarin's mission is to make it fast, easy and fun to build great mobile apps. To accomplish this, we've spent the last two years asking ourselves, "What can we do to delight mobile developers?" This question led us to build Xamarin Platform, Xamarin Studio, Xamarin University, Test Cloud and many more exciting tools and services.

We have over 1,300,000 registered developers, and more than 15,000 customers—but our ambitions are much greater. We're looking for passionate, talented individuals who love developers as much as we do, to join us in building brilliant products and services that inspire and delight developers around the world.
