

Improvements and implements I can make:

- Ad bio copy
- Maybe email sequence for their webinars

Hi TMap, I had some ideas for getting more leads into attending your webinar, do you have time to chat?

Hey TMap, I was wondering if you have ever thought about making an email sequence for your people who have signed up for your webinars

When you send emails to your webinar sign-ups, you can remind people about it, or even upsell your product to them because emailing is 40x more effective than social media

Hey Tmap, I reached out a couple of weeks ago and it looks like you weren't interested or didn't see my message with the idea of making email sequences for your webinars. And so I do not want to annoy you so this will be my final message.

If you want to talk about how the email sequences and how I can make more money for you just send a quick reply, if not you can just stay silent.

Bye 🖐️
