going seventeen ✧ a playlist of my favorites - will add more as i work through episodes. don't have to watch in order but might catch more references if you do

project debut big plan ✧ pre-debut show - not a "survival" show bc the plan was to debut all of them from the start

game caterers ✧ episode 3-1 is a precursor to nana tour but watch the whole thing if you have time

variety shows and interviews

nana tour ✧ the singular best piece of svt media to ever exist - it took me a month to get through but sooo worth it (if this totally legal link doesn't work or quality is bad, ask my for my weverse login i got u)

hit the road ✧ bring tissues

lollapalooza berlin ✧ dare i say their best setlist - also life-changing for mingyu and scoups biases

music videos and performances ✧ my personal favorites
