

## Chrome Store Privacy Settings

### ist For Beginners (Low CPC)

binagcchhpkahikhfpdmblaejfihikddg

#### Single purpose

An extension must have a single purpose that is narrow and easy-to-understand. [Learn more](#)

Single purpose description\*

Step by step YouTube advertising checklist for beginners to help you get your first campaigns up and running, even if you have with a low budget and for targeted traffic and audiences in any niche.

197 / 1000

#### Permission justification

A [permission](#) is either one of a list of known strings, such as "activeTab", or a [match pattern](#) giving access to one or more hosts. Remove any permission that is not needed to fulfill the single purpose of your extension. Requesting an unnecessary permission will result in this version being rejected.

 Due to the Host Permission, your extension may require an in-depth review which will delay publishing.
