

Walkthrough Video

Version 1

Thank you so much for scheduling your first visit!

Here's what you can expect when you walk through our doors:

You'll be greeted by one of our friendly staff, who will check you in and make sure any necessary paperwork is filled out prior to your appointment.

You'll then be able to relax in our waiting area — have some tea, coffee, or water, and enjoy some informative videos on the TV.

Next, our chiropractic assistant will call you back to perform vitals and a digitized posture screening.

After that, you'll meet with the doctor, who will review your medical history, perform a thorough examination, and discuss your health concerns and best treatment options.

If you have MRIs, please bring them with you to your appointment. If you don't have any, we can refer you out if needed.

If you're a candidate for spinal decompression, we'll schedule a second visit for you to try out the DRX9000 table and determine how many sessions will be recommended for your customized treatment plan.

Version 2

Welcome to our clinic! When you arrive, you'll be seated in the waiting area where you'll fill out your intake form.

You'll also find educational materials available for you to review while you wait.

From there, we'll move into the exam room — this is where we'll perform a detailed examination, give you your diagnosis, and review any MRIs or X-rays together.

Next, we'll head over to the decompression room. Here, we have the decompression table — this is where we'll weigh you and customize your treatment settings to your exact needs.

Each treatment is tailored to the patient. We set the angle and weight precisely for you, so you can relax while the decompression does its work.

We also have a computer system that controls the decompression process, ensuring accuracy and comfort.

You'll lay down on the table as the harnesses gently pull the spine apart to create space and relief for the discs.
