Options for Senior Year:

*Seniors are required to carry the equivalent of four classes during each semester. The following options can be combined to achieve four hours. *non-credit option*

TRADITIONAL SENIOR YEAR SCHEDULE: Seniors can stay at Selinsgrove, enrolling in diverse electives, AP and advanced courses, and finishing any graduation requirements.

***CAREER EXPERIENCE:** Spend up to two blocks with a professional in-district employee. This is a great option for students who are considering education, ESL, speech/physical/occupational therapies, maintenance, or other careers in the education system. Since supervisors are employees of the district, supervisor clearances are already on file.

***CO-OP:** Geisinger offers a formal cooperative education program for seniors interested in Medical, Technology, Maintenance, Marketing and other careers. Interested students will need to apply in December of their junior year to be considered for the program. Students will interview for the position and will know by late spring if they will be offered employment. Students will receive more information during their Career Prep class or

Seal Time. Visit https://jobs.geisinger.org/highschool for more information.

EARLY COLLEGE EXPERIENCE: Students can enroll in up to 9 credit hours per semester at Bloomsburg University giving them a jump-start to earning college credits and experiencing firsthand what college courses have to offer.

DUAL ENROLLMENT: Juniors and seniors can take college courses (online) through Luzerne or Lackawanna or in-person classes at Susquehanna University. Courses will be scheduled through their Selinsgrove HS guidance counselor.

***INTERNSHIP:** Paid or unpaid positions, with professionals outside of education. Students are encouraged to explore the career cluster with which they are most interested by researching local business and industry opportunities and worksites. They will work alongside and learn from local professionals. Potential students should schedule a meeting with the Career Education Coordinator. All supervisors must submit volunteer clearances to be considered as a host worksite.

SUN AREA TECHNICAL INSTITUTE: Sun Tech, located in New Berlin, offers 19 technical full day Career & Technical Education programs. Juniors can tour their top three programs in November. Applications open in January. Visit https://sun-tech.org/ for more information.

Seniors must complete all graduation requirements to be eligible for these options.
Doubling up on an English course is recommended. See Course Description Handbook for more details.

Graduation Requirements

To graduate from the Selinsgrove Area High School, students must complete the following requirements:

- Demonstrate proficiency of the PA standards
- Satisfy Board approved graduation requirements for course work
- Satisfy PA Act 158 requirements
  - Keystone Proficiency, Composite Keystone Score, Industry Cert., or Career Portfolio
