

Small Apothecary Overhaul

REQUIRES THE [XML INJECTOR MOD!](#)

Small Apothecary Overhaul

This Mod changes a few Features from the Apothecary Table.

How this Mod works:

Better Retail Price

Changed the Retail Price of crafted Items to better fit the Ingredients costs. Does not make sense to pay more for Ingredients than I can sell the crafted Item for. Now you can sell the crafted Item for 2x the Ingredients Costs.

Purchase all Ingredients

Added missing Ingredients to the "Purchase Basic Apothecary Ingredients" like the Cowplant Berry, Tulips, and all Emotion Potions.

Craft more at once

You can enable (and disable) the Feature "Craft more at once" by shift clicking (testingcheats need to be enabled) on the Apothecary Table. With this enabled your Sim will craft 5 Items instead of one, but it will cost 3x more Ingredients. It needs to be enabled on each Lot you want to use this!

Available Languages:

English (default)

German
