

Day 1 Number Talks

<http://tinyurl.com/day1numbertalks>

Ground Rules

Everyone's voice matters. Be respectful when someone is giving their opinion.

Everyone will be asked to take risks and be uncomfortable. Being uncomfortable is OK. It is a part of growth and learning.

Today's Number Talk is mental math

1. You will be given a problem and time to work out the problem mentally.
2. You will be given some time to share your idea with someone near you and get feedback.
3. As a whole class we will share out potential solutions.
4. Then as a whole class we will share out methods for those solutions.
5. Depending on time, we will use one or more methods on a new problem.

Simplify

$$5 \cdot 18$$
