

iAwake Technologies - Audio Acupuncture

Qi-Encoded Nature Sounds for Healing, Renewal, and Releasing Stress

Digital Acupuncture, a part of iAwake's Energy Alchemy Series (formerly called Audio Acupuncture), contains soundtracks embedded with a unique energetic signature of the human acupuncture meridian map which optimizes the healthy flow of qi through all the acupuncture meridians. Experience feeling uplifted, calm, invigorated, high, relaxed.

Benefits

This program features a unique biofield entrainment formula designed to help you naturally experience feeling:

- Uplifted
- Calm
- Warm
- Invigorated
- High
- Relaxed

Digital Acupuncture may also benefit:

- Profound movie and music experiences
- Releasing Stress
- Heightened physical and mental well-being
- Anxiety

I always feel a strong energy flow (vibrations) going up my legs when listening to these tracks. They have been great for “grounding” me, for rooting me in the now, in a very physical/energetic way. They also activate my heart chakra. And give me an extra push besides my main meditation.

~ Andre Lima

The energetic frequencies embedded within these beautiful nature sounds create the right environment for healing and releasing stress. I could feel the biofield energies activating my meridians in ways that I have only previously felt while in an actual Acupuncture treatment session. Somehow, this audio creates an openness for the body and mind to synergistically communicate with each other so healing can take place.

~ Mike Lapetina

Someone once told me that we are our most authentic self when we are laughing hysterically. At those moments we are totally present in the moment and every cell and fiber of our being is activated and completely focused on the same message. In many ways listening to Digital Acupuncture is a similar experience. I hope that other people enjoy it as much as I do.

~ Michael Halbfish

Additional Info

The Experience

Play Digital Acupuncture at a comfortable volume through loudspeakers in the background: Your whole environment will be infused with the subtle energetic frequencies of nature, facilitating a sense of balance, calm, and clarity.

Listen to Digital Acupuncture with headphones: Listening to Digital Acupuncture with headphones provides the optimal effect for deep and profound contemplation and meditation.

Play Digital Acupuncture silently WITH NO VOLUME: You might find yourself in a situation when you'd like to experience the benefits of Digital Acupuncture, but it's inappropriate to be wearing ear buds or listening to music. No problem! Place Digital Acupuncture on "repeat" on your MP3 player, then turn the volume down to zero and don't worry about using your ear buds at all. Due to the powerful biofield (subtle energetic) entrainment technology contained in Digital Acupuncture, it will create a calm, peaceful, harmonious field even at zero volume. Some people are more able to consciously detect this energy field than others, but your body and biofield will still register and benefit from it nonetheless.

The Story

Notes from Eric Thompson, creator of Digital Acupuncture:

Why did you create Digital Acupuncture?

Whenever I create a new program, one of my main motivations for doing so is the desire to express higher and higher levels of the technology, to create something that'll help elevate consciousness in some specific way. In this case, I wanted to build on the foundation of a previous program, Audio Chi, and take it to a new level. That program is still quite relevant and powerful, but I wanted to expand its application, benefits and overall power.

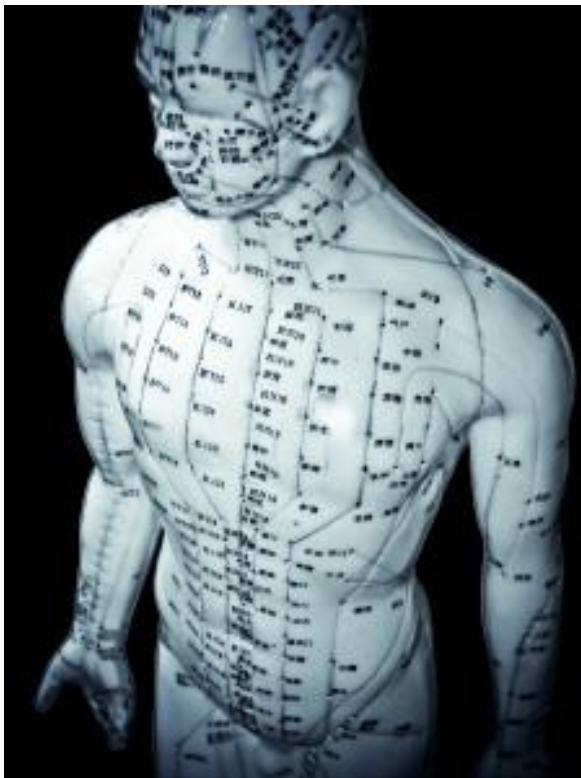

Rather than incorporating audio brainwave entrainment, as Audio Chi does, *Digital Acupuncture relies wholly upon our subtle energetic biofield technology*. We've made significant upgrades to this aspect of our technology, and we've already received

reports from participants who've said **they find it hard to believe that this recording contains absolutely no audio brainwave entrainment in any form.**

Although it will entrain brainwaves, it does so entirely through the use of subtle energetic signals embedded into the audio files. In fact, a common report is that people are being led into deep states of relaxation and meditation very easily and quickly using this recording.

The subtle energetic formulation contains the signatures of life force energy and the optimal flow of qi through the acupuncture meridian system. *It's like a tuneup for the acupuncture system, fine-tuning it to release blockages of qi.* Whereas Audio Chi broadcasts a general transmission of life force energy, **Digital Acupuncture directs that transmission to and through the acupuncture meridians in a very specific way.**

Some of the benefits people report with this program:

- Improves sleep when listening while drifting off in the
- Supports endurance during hiking
- Possible pain relief effects
- **Deep relaxation**
- Meditation
- Increased creativity
- Decreased irritability
- **Decreased energetic drain after working on the computer for extended periods**

- General healing
- **Improved qi-flow**
- Decreased fatigue
- **Increased pleasurable tingling feeling in body**
- Can be used safely with other forms of stimulation for meditation, peak performance, etc.
- Facilitates removal of energetic blockages
- **Euphoric effects similar to those experienced in actual acupuncture treatments**
- Mind-body synchronization
- **Soothing to the nervous system**
- Quiets mental chatter
- **Great for Qigong practice**
- Increased feelings of groundedness

How has the response been so far?

Everyone seems to universally love the 3D nature soundtrack, which subtly shifts from one nature scene to another over time, rather than looping. We've been told that the experience is much more life-like than typical stereo recordings of nature. When asked how we might improve this recording, one person responded, *"By making more of them. I want more! No, seriously, they are stunning."*

~ Eric Thompson

The Details

- Three 20-minute nature tracks (60 minutes total)
- A comprehensive User eManual
- Powerful subtle energetic (biofield) frequencies that are naturally stress-reducing, healing, deeply relaxing and uplifting, centering and calming
- Ongoing support (live weekly coaching call, responsive email, active Facebook forum)

The Technology

This recording is embedded with the subtle energy frequencies of:

White Light

A powerful "spiritual solvent" capable of clearing negative emotions and blocks to spiritual awakening; associated with healing, shielding from negativity.

Energy of the Golden Mean

Found to be present at sacred pilgrimage sites; sattvic (harmonizing) properties; profound centering and balancing qualities; deeply calming and purifying.

Qi

Naturally stress reducing; healing energy.

Horizontal Negative Green

A powerful spiritual carrier wave involved in prayer, meditation and spiritual and psychic phenomena (like distant healing and non-local, or faster than the speed of light, communication).

Orgone

Contains all 12 higher harmonics – Horizontal Negative Green, Black, Infrared, Red, Orange, Yellow, Positive Green, Blue, Indigo, Violet, Ultraviolet and White. Can be very invigorating, and tends to push stuck qi until it moves and becomes unblocked.

Acupoint Signatures

Contains a unique energetic signature of the human acupuncture meridian map, which optimizes the healthy flow of qi through all the acupuncture meridians.

Special Element Blend for the Nervous System

Contains the energetic signatures of the precise elements (from the Periodic Table of Elements) that, in proper application, have a soothing, stabilizing, regenerative, and healing effect on the human nervous system.

Brainwaves

Alpha, Theta, and Delta brainwaves have been associated with acupuncture treatment, and are included in this formulation. The result, when mixed with the subtle energies in this formulation, is beautifully calming AND invigorating at the same time, leaving one feeling deeply centered yet ready for high energy movement.

User Reports

In my experience, this is your best product to date, at least for my physiology. I could not be more pleased with having it as a tool for my life. I immediately experienced positive outcomes from using it. It seems to soothe my nervous system, give me consistent energetic support, and give me interims of integrated resonance, wellbeing and bliss (almost like Mother love).

~ Drea Howerstein

I am shocked that there is no Brainwave Entrainment embedded in these tracks, because my experience would like to argue otherwise! The Biofield effect is so powerful, that I feel just as deep of a reverie and meditative state with Digital

Acupuncture, as I often do with many Brainwave Entrainment tracks. Perhaps this is in part due to the stimulation of the acupressure points directly? Anytime I receive an acupuncture treatment, I feel a unique and wonderful sort of trance. These audios seem to produce the same, powerful effect.
