

Hatchet Essay

Hatchet by Gary Paulsen is a book. my life is real. The book is not. I am real brian the main character. Brian alone in the woods I am not. Brian's parents are not together anymore.

My parents are still together. I have trouble eating healthy and Brian has trouble eating at all.

I don't like reading . I don't know if Brian doesn't say book but at least I have something to do.
