

Title: 12-point Times New Roman, centered, bolded

Authors' names listed with **presenting author name bolded**, affiliations indicated with ^{superscript}, and post-nominal doctoral initials (where applicable): 10-point Times New Roman, left-aligned

^{superscript} *Authors' affiliations, indicate country if outside U.S.: 10-point Times New Roman, left-aligned, italicized*

Abstract: The body of your abstract begins here. It should be an explicit summary of your presentation that states the problem, the methods used, and the major results and conclusions. Do not include scientific symbols, numbers, bullets or lists in the abstract. Any acronyms used must first be defined. It should be single-spaced in 10-point Times New Roman, and justify alignment. The first part of your abstract should state the problem you set out to solve or the issue you set out to explore and explain your rationale for pursuing the project. The problem or issue might be a research question, a gap in critical attention to a text, a societal concern, etc. The purpose of your study is to solve this problem and/or add to your discipline's understanding of the issue. This section of the abstract should explain how you went about solving the problem or exploring the issue you identified. Your abstract should also describe the research methods; this section should include a concise description of the process by which you conducted your research. Next, your abstract should list the results or outcomes of the work you have done so far. If your project is not yet complete, you may still include preliminary results or your hypotheses about what those results will be. Finally, your abstract should close with a statement of the project's implications and contributions to its field. It should convince readers that the project is interesting, valuable, and worth investigating further. In particular, it should convince conference registrants to attend your presentation. The abstracts will be peer reviewed and authors will be informed about acceptance for presentation via email. Be sure to adhere to the word limit for the abstract. **(250 words)**

Keywords: 3-4 chosen by author, should be broad topics that represent your content
