Privacy Policy

Effective Date: October 20, 2024

This Privacy Policy outlines how we handle your information when you use our mobile application, available on the App Store.

1. Information We Collect The only data we collect through application is crash data, which is collected via **Firebase Crashlytics**. This crash data helps us identify and fix issues within the app to improve its performance and ensure a smooth user experience.

The crash data may include:

- Device information (such as device type and operating system)
- App version
- Information related to the crash (error logs, stack traces)

We do not collect any personally identifiable information (such as your name, email address, or location) through the app itself.

2. How We Use the Information The crash data collected is used solely for the purpose of improving the functionality and performance of the app. We analyze the crash reports to:

- Identify bugs and errors
- Enhance app stability and performance
- Optimize user experience

3. Sharing of Information We do not share or sell any data collected through application with third parties, except as required for the functioning of Firebase Crashlytics, which is a service provided by Google. Firebase Crashlytics may use the data as part of its service offerings, and you can review their privacy practices on Google's website.

4. Data Security We are committed to ensuring the security of your crash data. Firebase Crashlytics employs industry-standard security practices to protect the information it collects. However, no data transmission over the internet or method of electronic storage is 100% secure, and we cannot guarantee absolute security.

5. We prioritize the privacy and security of our users' data. Some of our applications need user photo. User photos are not stored on our servers. After processing (such as background removal), the photo is immediately returned to the app, and **no copies are kept on our servers**.

6. Data Retention Crash data is retained only as long as necessary to resolve issues and improve app performance. Once the data is no longer needed for these purposes, it is deleted.

7. Your Choices Since we only collect crash data, there is no personal data collection for you to opt out of. However, you may choose to stop using the app if you do not wish for crash data to be collected.

8. Changes to This Privacy Policy We may update this Privacy Policy from time to time. Any changes will be reflected in an updated policy, and we will update the "Effective Date" at the top of this page.

9. Contact Us If you have any questions or concerns about this Privacy Policy, please contact us at:
