ARTICLE TITLE: TIMES NEW ROMAN; SIZE-14; LINE SPACING: MULTIPLE. PARAGRAPH SPACING: ABOVE PARAGRAPH-10PT, BELOW PARAGRAPH-10PT

First Author[1], Second Author[2] (Times New Roman, Bold 12pt)
[1]First Author Institution (Times New Roman, Italic 12pt)
[2] Second Author Institution (First and second author are difference institution)
(Times New Roman, Italic 12pt)

Email First Author (Times New Roman, Italic, Underline 12pt)

Abstrak

Memaparkan tujuan penelitian, subjek penelitian, dan tempat penelitian dilaksanakan dengan menggunakan bahasa yang mudah dipahami, singkat, dan jelas. Metode penelitian harus sesuai dengan tujuan penelitian sehingga hasil penelitian dapat disajikan sesuai dengan kriteria atau indikator yang digunakan. Kesimpulan merupakan pernyataan akhir yang berisi pernyataan singkat yang menjawab rumusan masalah penelitian. (Menggunakan Times New Roman Ukuran 10pt dengan spasi tunggal dan maksimal 200 kata)
Kata kunci: (Terdiri dari 3-5 kata yang disusun secara alfabetis, dipisahkan dengan tanda titik koma)

Abstract

Describe the research objectives, research subjects, and place of research carried out using statement that is easily discussed, briefly, and clearly. The research method must be in accordance with the objectives of the research so that the results of the study can be in accordance with the criteria or indicators used. Conclusion is the last statement which contains a short that answers the research's problem. (Using Times New Roman Size 10pt with a single space and maximum 200 words)
Keywords: (consists of 3-5 words arranged by alphabet, and separated by semicolons)

INTRODUCTION

The Introduction section is written without the subsection, contains the problem clearly, the newest/urgent research topic that it is supported by literature review such as results of relevant research, research objectives. You should use the latest literature (no more than 5 years). Introduction word is written from the left using

capital letters and bold. The Introduction section is written with times new Roman size 12pt. The description in Introduction section used one point five (1.5) space.

METHOD

This section describes how to get the data. Quantitative research must consist of (1) research variables, (2) research design, (3) data collection techniques and instrument development, and (4) data analysis techniques. Qualitative research must describe the approaches and methods used in research.

The author can show the reference source so that readers who want to know more can search and read their reference books. If you use a statistical software package, the name of the software needs to be mentioned in full with the version. There is no subsection in method. The word method is written from the left using capital letters and in bold. Method section was written with times new Roman 12pt size. The description in the method Section is written one point five (1.5) space.

RESULT AND DISCUSSION

The results of the study contain the results of the analysis carried out on the data that has been collected. Testing the hypothesis and statistical calculations do not need to be presented in detail, described in the form of essays. Submission of research results can be helped by the use of tables or graphs accompanied by additional narratives to make it easier for readers to understand. The table presented should be a concise table with one spacing. Tables, graphs and the like should be written near the text that refers to them. Figure/graphic information is placed below the figure/graph, while the table title is placed above it. The title begins with a capital letter.

Table 1. Summary Cofactor Analysis

	Different Two Ways Variance					
	JK	*dK*	*RK*	F_{obs}	*Fa*	Decision
Method (*A*)	3576.1492	2	2088.0746	25.6144	3	H_{0A} rejected
Courisity (*B*)	350.2605	2	125.1302	5.0330	3	H_{0B} rejected

Interaction (*AB*)	135.2931	4	58,8233	2.0538	2.37	H_{0AB} accepted
Error	20751.4468	318	45.8222			
Total	22413.1496	326				

All of the figure and table are given title and number that positioned in above and below in one same page. The figure and table must show in one page. The graph should be original (no scanning).

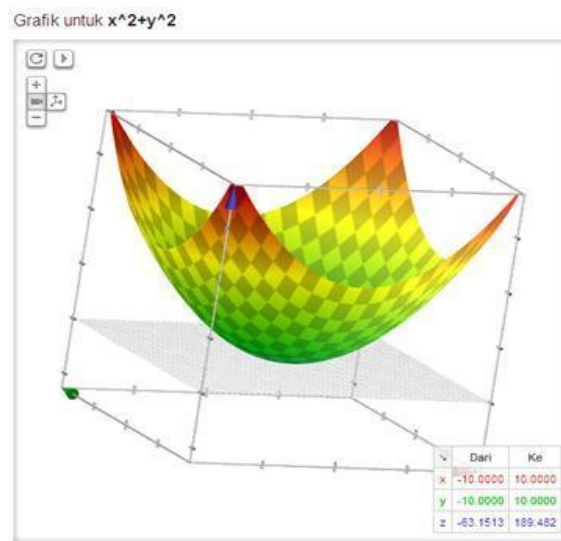

Figure 1. Graph Quadratic Equation

In discussion section, the author must show the research result then contained interpretation. The author make connection between research result and review literature or relevant research result. The last point, the author should give information about the simility and difference the reseach result and theoritical concept that used in his research. The Introduction section is written with times new Roman size 12 pt. The description in result and discussion section used one point five (1.5) space.

CONCLUSION

Conclusion present a summary of the description of the results of the research and discussion. Conclusions should be used as a simple statement so that the reader can understand what the author means. The conclusion should not include sentences containing statistical terminology and statistical numbers. Unless the research findings are large enough, it is recommended not to use the enumeration format in the conclusions of the study.

Conclusion may include recommendation should be developed based on research findings. Suggestion can be practical actions, developing new theories, and/or further research. Conclusion and suggestion are written from the left using capital letters in bold. The description in conclusion and suggestion section used one point five (1.5) space.

REFERENCES

The reference uses APA (American Psychological Assosiation version). Management reference bases Zetore/Mendeley. References are written with 1.5 spaces.
