

High School (Grade 9 - 12) Supply List:

- Bring your own device (BYOD) with carrying case*
- 1 dial-style combination lock
- Binders or notebooks for each of your classes
- 1 set of dividers with labels
- Lined paper
- Scientific calculator (Math 9)
- Texas Instrument Graphing Calculator (Math 10 or higher)
- Pencils
- Pens
- Highlighters
- Pencil crayons and/or markers
- Ruler

*A good BYOD computer is one that:

- **Has a Good Battery Life** - Students will want enough to get you through the day without needing to frequently charge their device. Having a charged computer is the number one challenge we see students facing with regards to their devices
- **An English Operating System** - Chrome OS, Windows 10 or MacOS are highly recommended
- **An Attached Keyboard** - Phones do not qualify for our BYOD program and iPad's present some additional challenge so they must come with an Accessory Keyboard.

****Note:** teachers may have specific supply requests for their courses. Requests of this nature will be shared on the course outline during the first week of classes.
