 Just Launched: Rentable GPTs Are Here
[New] Turn ChatGPT into Monthly Cash
[New] Resellable AI Tools That Clients Actually Want

Body:

Hey [Name],

Big news — the *AI Rental Machine GPTs* just launched... and they're unlike anything else on the market right now.

Instead of selling “AI ideas” or “prompt packs,” this gives you **3 done-for-you GPTs** you can **rent out to clients** like digital vending machines.

- ✓ No coding
- ✓ No API
- ✓ No prompt-writing headaches
- ✓ Just copy → paste → profit

And yes — you get **full Resale Rights**.

Each GPT is already built to solve a real, painful problem for a specific type of client — like therapists, real estate agents, and school administrators.

That means you can:

- Sell them
- Rent them
- Or use them for your own biz

And it's all just **\$7 one-time** (on a dime sale).

(Insanely low for something you can rent over and over again.)
