SL: Make it INK!

Hi clubtattoo team

I like that your website has a 30s video showing the whole studio, making watching the site more engaging, and at the same time keeping the website simple and transparent.

I've just completed analyzing two of the most influential tattoo studios in the US: "Urban Art Tattoo" and "hhtattoo",

And I want to show you one of the techniques they used to have giant conversion rates on their newsletter.

I want to do it because I believe that clubtattoo studio has a huge growth potential.

And implementing it will work in your case because you have about 15k followers on Instagram, which is a great number to start.

Would you like to know more?
