

[Full Research Title — Bold, Size 16, Title Case]

(The title should accurately, clearly, and concisely reflect the emphasis and content of the paper. The title must be brief and grammatically correct)

[First Author Name] • [Second Author Name] • [Third Author Name]

[Department, College, University — Country if outside Iraq]

[corresponding.author@email.com]

(AUTHOR NAMES (Word Style “BB_Author_Name”). Include in the byline all those who have made substantial contributions to the work, even if the paper was actually written by only one person. Use first names, initials, and surnames (e.g., John R. Smith) or first initials, second names, and surnames (e.g., J. Robert Smith). Do not use only initials with surnames (e.g., J. R. Smith) because this causes indexing and retrieval difficulties and interferes with unique identification of an author. Do not include professional or official titles or academic degrees. At least one author must be designated with an asterisk as the author to whom correspondence should be addressed.)

(AUTHOR ADDRESS . The affiliation should be the institution where the work was conducted. If the present address of an author differs from that at which the work was done, indicate with a symbol and give the Present Address under Author Information. If more than one address, use symbols to match author names to address(es).)

Abstract

◆ *Maximum 250 words. Single line spacing. Do not exceed this limit.*

[Write your abstract here. Summarize objectives, methods, key results, and main conclusions. Must not exceed 250 words.]

(ABSTRACT . All manuscripts must be accompanied by an abstract. The abstract should briefly state the problem or purpose of the research, indicate the theoretical or experimental plan used, summarize the principal findings, and point out major conclusions. Abstract length is one paragraph.)

Keywords: *[keyword1; keyword2; keyword3; keyword4; keyword5]*

Introduction

[Provide background and rationale for the study. Clearly state the research objectives and significance. Body text: Times New Roman, size 14 (28 half-points), justified.]

Materials and Methods

[Describe study design, patient/sample collection, laboratory procedures, statistical analysis. Provide sufficient detail for reproducibility.]

Results and Discussion

[Present results with appropriate figures, tables, and statistical analyses. Discuss findings in context of existing literature.]

[Figure / Image Inserted Here]

Figure 1. [Descriptive figure title — bold, size 14]

Table 1. [Descriptive table title — bold, size 14]

Parameter	Group A	Group B	P-value
Row 1	[Value]	[Value]	[p value]
Row 2	[Value]	[Value]	[p value]
Row 3	[Value]	[Value]	[p value]

Conclusions

[Summarize the main conclusions drawn from the study. This section is applicable where relevant.]
