 - i. **Using Math Models in K-8: How Pictorial Models Provide Consistent Gateways to Conceptual Understanding Across Grade Bands (A Nebraska Department of Education Virtual Event co-sponsored by Great Minds)**
We all want our students to understand the WHY behind math. How can we deepen our students' understanding and lift their reasoning beyond mere algorithms? Too often we jump our students from manipulatives straight to abstract concepts. Instead, this grade band-specific PD will enable you to equitably support your students by nurturing the pictorial stage in the concrete-pictorial-abstract progression of learning. Models are a critical key in unlocking mathematical reasoning, maximizing instructional time, and improving student learning.
K-2: April 13 and April 15, 2021,
Gr 3-5: April 19 and April 22, 2021,
Gr 6-8: April 26 and April 29, 2021
 - ii. **Complex Texts and Knowledge-Building in 6-12 Literacy (A Nebraska Department of Education Virtual Event co-sponsored by Great Minds)**
What are complex, grade-level texts and why are they essential to literacy development? How can we use knowledge-building to help students have something substantial to talk and write about? In this session, participants will examine research and evidence-based practices to learn the connections between complex texts, knowledge, and literacy development for middle and secondary learners—including struggling readers. Participants will also explore tools for assessing the quality and rigor of units designed around novels.
