File Accessed, Welcome Διρεκτορ Κοράλ

BirthPlace - Dallas, Texas

Birthname - Johnny Walker

Gender - Male

Nationality - Caucasian

Height - 211 cm

Weight - 95 kg

Age - 33

DoB - February 2nd, 1992

Eye Color - Blue

Hair Color - Black

Likes - Chemistry, SCP-████, MTF █████-9 designated "B████████"

Dislikes - CI Cell-56 Commander "P████████", SCP-████-█

Phobias - Mnemophobia, Fear of remembering

History - Johnny Walker, born in 1992 to Joseph and Elizabeth Walker, both of them being employees of The Foundation. Johnny was informed that his parents had been killed in a car accident after they were killed in a containment breach on Site-████. Johnny was then moved to

a foster home where he stayed until the age of 19 at which time he applied to join the CIA in which he got accepted and performed covert operations in Canada for the next 3 years. Johnny eventually found himself in the world of the anomalous during an operation in Quebec, Canada. Johnny came into contact with a previously unknown anomaly now known as SCP-████. Johnny found the SCP roaming around his safehouse in the forest while he was looking for the reason his Generator turned off. Johnny found the source of his generator problem but didn't like what came with it, the Deer was staring at Johnny from afar causing him to hallucinate things, Johnny feeling like he was in danger pulled out his gun and started shooting the Deer that was staring at him, he managed to take down the Deer after unloading about 12 rounds into it. Johnny reported the incident to his superiors who thought him to be under the effects of drugs due to the fact that Foundation Agents had already cleared the scene of any evidence of the Deer's existence. The CIA then discharged him under suspicion that he was on drugs during an operation. Johnny came into contact with the foundation 3 years later at his home in ████████, Canada. Johnny was contacted by the Foundation due to his history with the CIA and SCP-████. We requested he join our operatives within the Department of External Affairs because of his excellent history of stealth and his secretive nature from his time within the CIA. Johnny had accepted our offer and was instructed to come to Site-████ which was coincidentally located very near to his home in ████████, Canada. Johnny was indoctrinated and given proper clearance access and was taught about the Foundation and what he would be doing with us, after we told him about the SCP he saw he seemed to almost jump at the opportunity to join us. Johnny stayed with the Department of External affairs for the next 4 years before being promoted to the role of Senior Agent within the department which he has been for the last 9 years. Johnny has applied to become a Special Agent within our department and we now are deciding whether he should be promoted or if he should stay as a Senior Agent.

Description | Johnny is a tall figure with black hair and blue eyes, he's a middle aged man with shrapnel scars covering his back from a faulty grenade that went off during his training.
