Tier Explanations and Criteria:

Notes:

All tiers are ordered within themselves. List is based mostly on how good a team is theoretically. This is a synergy list, not necessarily an indication on a team's overall strength. The list evaluates how well Orie benefits from a certain partner, with how well the other character benefits from Orie as a strong secondary factor

S Tier: Orie's best teams.

Teams that accentuate Orie's strengths and greatly bolster her gameplan, while the other character still benefits a good amount from Orie. Incredibly strong Orie focused teams with good double sided benefits.

A Tier: Strong teams

Teams are either:

A: Teams where both characters provide things that significantly help each other but aren't necessarily providing the best support for each other. Has good but not great dual synergy
OR

B: Characters that support Orie extremely well, but aren't supported too much by Orie themselves. Characters are able to use Orie decently well. Very strong for Orie, but just okay for the other character

B Tier: Good teams

Teams are either:

A: Teams that are very strong for Orie, but the other character isn't provided with a lot of the things they want/need from Orie.

OR

B: Solid overall teams where both characters provide a decent amount of the tools each other want, but nothing particularly outstanding.

OR

C: Characters that actually really appreciate Orie as an assist, but don't help Orie significantly

C Tier: Okay to Mediocre Teams

Teams are either

A: Unimpressive teams, where both characters give each other some usable but not overall good tools. Still fairly functional but lacking.

OR

B: Provide Orie with a strong assist kit, but don't benefit much or at all from having Orie and are generally reliant on having a good partner to be able to thrive

D Tier: Bad teams

Teams where both characters don't really provide each other what they want, and having very glaring issues. Teams have the bare minimum to be able to function and maybe even less than that.

Tager

Tager gets his own tier for TomoA's sanity

Ending Notes: :

The list is just my opinion and is subject to change in the future.

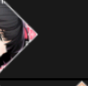

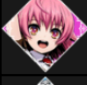

If you have any questions or arguments for any individual placement of a character feel free to ask me.

Also, just because I think a team has poor synergy does not mean it's unworkable, it's just an indication that the team has less merit. I completely encourage anyone to try out whatever team they want and find ways to make it work.
