4 Questions

1 - Who are you talking to?

Avatar:

- **Name, Age, and Face:** Sarah Thompson, 27 years old, radiates warmth with a friendly smile that reflects her caring personality. Her face shows signs of skin concerns like fine lines and pigmentation, highlighting her desire for effective skincare.
- **Background and Mini-life History:** As a successful marketing executive, Sarah's career demands a lot of her time. She's health-conscious and has always prioritized self-care. Despite her achievements, she battles with skin issues, leading her to explore different skincare options.
- **Day-in-the-Life:** Sarah's routine involves a healthy skincare regimen, work commitments, and social engagements. Evenings may include networking events or family time. Her skin concerns often make her feel self-conscious, influencing her choice of skincare products.
- **Values:** Sarah values natural beauty, self-care, and preventive skincare. She despises superficiality, vanity, and cruelty in the beauty industry.
- **Outside Forces:** Societal standards of beauty, opinions from friends and family, and the pressure to maintain a youthful appearance in her professional and personal life greatly influence Sarah.

Dream Outcome:

Desired Changes:

- Sarah dreams of having clear, healthy, and youthful skin that boosts her confidence
- She envisions going out without makeup and feeling beautiful and accepted.

Positive Perceptions:

- In her dream state, others perceive her as beautiful, confident, and happy & not lazy enough to not take care of herself.

Self-perception:

- Sarah would feel beautiful, confident, and happy with her appearance.

Painful Current State:

Frustrations:

- Sarah is frustrated with her skin not reflecting her vibrant personality, impacting her confidence - people don't treat her as well,
- The constant need to cover up imperfections with makeup annoys her, hindering her desire for a more natural appearance - putting on makeup takes time, makeup is bad for skin when on for long, she doesn't look natural,

Fears:

- Sarah fears her skin ageing prematurely and worries about finding a cost-effective and efficient solution.
- She fears that wearing makeup may damage her skin in the long term.

Anxieties:

- She lies awake at night, anxious about the ongoing battle with her skin concerns.

Perceptions:

- Other people may perceive her as not taking proper care of herself, affecting her self-esteem.
- She could be perceived as a bit lazy for not taking proper care, her social & professional interactions could be harmed.

Insecurities:

- Sarah is insecure about her appearance and her ability to age gracefully.
- She's insecure about guys studying her face on dates,

Desperation:

- Sarah is desperate for a solution that truly works and allows her to feel good about herself.

Roadblocks:

Cost and Fear:

- The cost of ineffective treatments and the fear of traditional microneedling's pain prevent Sarah from achieving her dream state.

Alignment with Values:

- Lack of a solution that aligns with her values and lifestyle is a key roadblock.

Mistakes:

- Sarah has tried various treatments, but perhaps she hasn't explored natural and non-invasive alternatives.

Understanding:

- Sarah might not fully understand the advancements in microneedling technology, offering a more comfortable experience.

Key Roadblock:

- Finding a natural and non-invasive solution that effectively addresses her skin concerns is the key roadblock.

Solution:

SQT Bio Microneedling:

- Sarah needs to explore SQT Bio Microneedling, a non-invasive, cost-effective, and comfortable solution.

Key Statement:

- "If she uses SQT Bio Microneedling, then she will be able to rejuvenate her skin naturally and feel confident about her appearance."

2 - Where are they now?

On Instagram or Facebook Scrolling Away.

They were dealing with all the negative effects of having skin problems,

3 - At the end of this piece of copy, what do I want them to do?

1 - I want to turn them into a warm lead - my client doesn't have a website I have to funnel them to her DM inbox.

2 - Get them to DM my client.

4 - If this is where they start and this is where they end, What are the steps they need to experience?

-The testing strategy you're using

Every post gets 500 impressions to see how much CTR it gets.

Right now I'm testing body texts and different creatives,

-Where your post is within that testing strategy

My best body text got a 1.46% CTR which is way below ideal,

I'm currently focusing on testing body texts although I do have some special ad creative aikido I wanna test out.

-What you've tested so far & what the metrics were for clickthrough rate, Cost/click, and CP conversion & Conversion rate (if you have it.)

I tested a few ads,

I tested a few images,

My best body text got a 1.46% CTR which is way below ideal,

Analysis

Personal analysis of weaknesses & how I think I can improve it:

Headline ain't good enough,

CTA may be bad,

I need to tease the product at the end so I know that the people are coming to my client from my ad.

The top customer call is too generic - they probs heard it a million times,

The creative may look a bit spammy and low quality - maybe I should change it to something more professional looking,

For the ad creative, this is what I'm thinking of using - used my creativity to come up with it since motion creates emotion and catches attention:

HL: Fatal flaw! Why most skin treatments FAIL to get that long-lasting fresh glow & how to get it in a matter of days...

Most skincare solutions like creams, serums, masques & microneedling, flop cuz they rinse your pockets,

& you borrow results (or don't get any), leading to it all reappearing - sometimes returning worse! 😬

This natural sponge powder uses an army of 3 - 5 million tiny spicules that BOOST the skin's collagen

Which shortens skin renewal from 28+ days to 7, giving my clients long-lasting, fresh, bright, glowing skin

& celebrity-like confidence 😊 - without any nastiness reappearing.

If you're serious about rising each day without acne, pigmentation & wrinkles, in a matter of days,

HL: The ONE fatal flaw most skincare treatments have...

Most skincare “solutions” fail because they’re NOT advanced enough, making them:

Short fixes, unnatural, painful, unpersonalised, with long downtime or they create unnoticeable changes

BUT, this 100% natural 🌲 sponge-like technology I launched 1 month ago has NONE of these!

Do you want fresh beautiful, bright, and acne-free skin? ☀️

If you don't have it, then the solutions you tried are:

A short fix, have long downtime, don't deliver noticeable results, unnatural or painful.

Luckily, there's a solution that has NONE of these! ❌

It's a 100% natural sponge needle technology I launched 1 month ago

Want fresh, beautiful, bright & acne free skin?

This new “biotechnology” vs microneedling:

☀️ 4x more collagen production - needs 4x less sessions to get that same glow.

🔄 4x faster skin renewal, shortened from 28 days to 7 days, 2x faster than a baby's!

✅ Can be done on active acne & greatly reduces acne + scarring after JUST 1 treatment.

❌ It does all of this because Instead of using a few big needles,

👁️ It uses a microscopic army of 3-5 million tiny needles.

Want fresh, beautiful & bright skin?

So did 1 of my now beautiful clients in her late 40s.

She came to me with acne and scarring

& told me that it really affected her self image and how other people interacted with her.

After giving her the “bio touch”, 2 weeks later, her skin's plump and clear.

Want fresh, flawless, bright & acne free skin?

So did 1 of my now stunningly beautiful clients in her late 40s.

She came to me a few weeks ago,

With a face full of acne and scarring,

& told me that it really affected her self-image and how other people interacted her,

She felt insecure but with my help, all of that is now GONE.

Luckily for her, 1 month ago, I was one of the first in the UK 

To launch a 4x better version of microneedling,

That eliminated her acne & evened out her skin tone

Making her skin beautiful, plump & hydrated. 

This vs microneedling  :

☀️ 4x more collagen production - needs 4x less sessions to get the same glow.

🔄 4x faster skin renewal, shortened from 28 days to 7 days, 2x faster than a baby's!

✗ Negligable/NO pain - Uses a microscopic army of 3-5 million tiny needles.

✓ Can be done on active acne - reduces acne + scarring first time.

🔬 Took 7 years of gruelling research by skin experts - fully backed by science.

💣 ELIMINATES pigmentation
